

Surface active agents?

- A molecule that contains a polar portion and a non polar portion is called surface active agent/ surfactant.
- A surfactant can interact with both polar and non polar molecules.
- A surfactant increases the solubility of the otherwise insoluble substances.
- In water, surfactant molecules tend to cluster into a spherical geometry non polar ends on the inside of the sphere polar ends on the outside .These clusters are called micelles

Surface Active Chemicals:

Surface Active Chemicals H. E. Garrett, 2013-10-22 Surface Active Chemicals presents a number of applications of surface activity This book provides a discussion of bulk solution phase properties which is important for proper understanding of surface phenomena Organized into seven chapters this book begins with an overview of the works of cohesion of some organic liquids and their works of adhesion to water This text then describes the properties of ordinary soaps which consist of blends of alkali metal or organic base salts of fatty acids of from eight to eighteen carbon atoms Other chapters consider the characteristic of soapy lather by the addition of excess fatty acid to soap which raises its proportion in the surface layer still further and tends to make the lather even creamier This book discusses as well the processes for the extraction of bone glue The final chapter deals with the statistics of production and sales for soaps and detergents This book is a valuable resource for chemists and senior students Surface Active Chemicals.
