Surface Activity In Drug Action:

Surface Activity in Drug Action, 2005-03-01 Surface activity is present in living systems for example in body fluid or cell soup and molecules of surface active nature are crucial to living matter and its organization Surface Activity in Drug Action proposes a liquid membrane hypothesis of drug action for surface active drugs Chapters 1-7 contains an account of the hypothesis and chapter 8 contains a general account of the application of surface activity in therapeutics The methodology and presentation of the information makes Surface Activity in Drug Action valuable reading for students and researchers interested in surface activity Is clearly written Includes contributions from prominent names in the field such as Bhise and Subrahmanyam Contains a general account of the application of surface activity in therapeutics

Psychopharmacology Abstracts, 1970 **Drug Actions** Mutschler, Hartmut Derendorf, 1995 The most highly acclaimed pharmacology and toxicology text reference used in Europe is now available in English This excellent translation of Mutschler's *Arzneimittelwirkungen* combines a clear informative narrative with 255 figures 261 diagrams and 198 tables to appeal to both new students and experts in pharmacy pharmacology and therapeutics Drug structure and activity relationships are emphasized as an important dimension that is sometimes lacking in other pharmacology texts Drug Actions is organized into three major sections covering general drug action and dosing principles specific drug therapeutics and toxicology The first section provides an integrated overview of basic principles in pharmacology with chapters addressing pharmacokinetics pharmacodynamics drug side effects drug interactions chronopharmacology rational and irrational drug combinations as well as drug developments and drug trials The second section systematically describes specific drug actions with pharmacology clinical indications standard doses side effects and contraindications described for each approved drug category The third section addresses toxicology where specific drug toxicities are identified and treatment options for accidental and drug associated poisoning are presented Topics covered include environmental occupational and nutritional exposure to toxins *Toxicity Bibliography*, 1977 *Index-catalogue of Medical and Veterinary Zoology*, 1976

Essentials of Pharmacodynamics and Drug Action Raja Chakraverty, Rajani Mathur, Pranabesh Chakraborty, 2024-07-01 The book provides a comprehensive exploration of the dynamic field of pharmacology and its fundamental principles It delves into the intricate interactions between drugs and the human body focusing on pharmacokinetics which explains the dynamics of drug actions in the body and pharmacodynamics which uncovers the mechanisms through which drugs exert their effects The book also emphasizes the crucial aspects of therapeutics and gene based therapy shedding light on modern approaches to disease treatment Readers will gain insights into drugs that target the autonomic nervous system influencing functions beyond voluntary control and drugs that act on the central nervous system impacting neurological processes Additionally the book examines medications affecting renal and cardiovascular functions playing a significant role in maintaining homeostasis Moreover it explores the realm of drugs influencing gastrointestinal function essential for digestive health Furthermore the

book covers pharmacotherapy for microbial diseases addressing the challenge of infectious agents and their treatment It also investigates hormones and hormone antagonists pivotal in regulating various physiological processes Lastly it provides a comprehensive understanding of drugs used for immunomodulation which plays a crucial role in enhancing or suppressing the immune system The book serves as a resource for students researchers and healthcare professionals seeking a deep understanding of drug interactions therapeutic applications and cutting edge approaches in pharmacology

Physico-Chemical Aspects of Drug Action E. J. Ariëns, 2017-05-17 Physico Chemical Aspects of Drug Action Volume 7 covers topics on drug kinetics and the overall physicochemical properties of the drug in relation therewith and the physicochemical aspects of the drug receptor interaction putting emphasis on receptor mechanisms and specific properties required for certain types of drugs in this respect The book starts with some contributions dealing with various general aspects of drug kinetics followed by some contributions dealing with the relationship between certain physicochemical properties of drug molecules and their action The text describes the pharmacokinetics and dose concentration relationships the time course of the biological response to drugs and the empirical equations for correlating biological efficiency of organic compounds The text also describes molecular basis for the action of chemotherapeutic drugs the structure activity studies on sulphonamides and the water extrusion hypothesis The mathematical treatment of two point attachment between drug and receptor the molecular properties and biological activity of catecholamines and certain related compounds and the structure activity relationships of diarylcarbinolethers are also considered The book further tackles quantum mechanically derived electronic distributions in the conformers of 2 pam and the molecular basis for the action of certain drugs in the central nervous system Pharmacologists and chemists will find the book invaluable *American Journal of Physiology*, 1928 Vols for 1898 1941 1948 56 include the Society's proceedings primarily abstracts of papers presented at the 10th 53rd annual meetings and the 1948 56 fall meetings

Advances in Lipid Research Rodolfo Paoletti, David Kritchevsky, 2014-06-28 Advances in Lipid Research Volume 8 covers the significant progress in understanding the lipid chemistry and biochemistry of plants and animals This volume contains seven chapters and begins with a discussion of the various aspects of cholesterol turnover in man and the possible mode of action of hypocholesterolemic regimens The next chapters deal with the arterial composition and metabolism with particular emphasis to esterified fatty acids and cholesterol as well as the important role of essential fatty acids in mammalian development health and disease A chapter emphasizes the participation of lipids in membrane structure The remaining chapters explore the chemistry and biochemistry of phospholipids and glycolipids These chapters also consider rumen metabolism and the surface chemistry of lipids This book will prove useful to biochemists organic chemists physicians and researchers

Biological Horizons in Surface Science L Prince, 2012-12-02 Biological Horizons in Surface Science presents techniques used in surface science research as well as experimental data It is organized in such a way that there is a transition from the more theoretical or molecular to the more biological Emphasis is

placed on the importance of water in determining molecular architecture and interactions. Methods of examining molecular associations and complex formation of molecules are discussed and the results from such studies are reviewed. Permeability is examined from the point of view of the energies required to penetrate between two different phases and from the role that multicellular membranes may play in directing the diffusion of ions or solutes in general. Current concepts of membrane structure based on membrane models are discussed and some new models are suggested. Application of surface science techniques and the unique energies present at interphases are considered with regard to drug interaction with biological tissue and immunological phenomena. The importance of surfactant protein lipid association is also discussed in regard to alveolar mechanics. This book is directed particularly to biologists who will find many of the techniques used of significance in their own research. It also aims to interest graduate students in this area of investigation.
