Surfactants Applications Directory:

Surfactants Applications Directory D.R. Karsa,1995-10-01 Surfactants are fundamental to the successful operation of the chemical industry This directory has been produced to assist surfactant users to identify the most appropriate products for their application

Surfactants Applications Directory D.R. Karsa,P.J. Donnelly,J.M. Goode,1991-05-31 Existing surfactants directories tend to focus on product identification by tradename producer or chemical type enabling the user only to identify product equivalents and surfactant suppliers Application information where available is usually scant or given as a footnote This new directory approaches the identification of surfactants primarily from the applications standpoint Hence the formulator or end user can readily assess the products available for use in a particular industry sector and select materials giving the required surface active properties For example a formulator of agrochemicals for crop protection can turn to the section which refers to surfactants for use in the agrochemical industry and then easily identify a wetter dispersant system for the production of water dispersible granules Information is presented in an alternative format in the second part of the directory which will help the user to identify swiftly products for a particular application by surface active properties It is difficult if not impossible to identify an industry which does not directly or indirectly utilise surfactants Therefore it has proved necessary to simplify industry classifications to encompass a variety of uses under broader sector titles The industry classifications adopted here have been used in many previous publications and papers and define as accurately as possible the major industries and applications serviced by the surfactant industry The editors have been particularly pleased with the support and response of the industry in the supply of data

data **Surfactants: Chemistry, Interfacial Properties, Applications** D. Möbius, R. Miller, V.B. Fainerman, 2001-12-21
This publication provides comprehensive material on the chemical and physical attributes of surfactants and new models for the understanding of structure property relationships. Surfactants Chemistry Interfacial Properties Applications provides efficient instruments for the prognostication of principal physicochemical properties and the technologic applicability from the structure of a surfactant through the discussion of interrelations between the chemical structure, physicochemical properties and the efficiency of technologic application. Also included are informative overviews on new experimental techniques and abundant reference material on manufacturers' nomenclature, product properties and experimental examples. The publication is accompanied by a CD ROM which is needed for the application of the thermodynamic and kinetic models to experimental data.

Handbook of Surfactants M.R. Porter, 2013-04-17
The worldwide consumption of surfactants now exceeds several million tonnes per annum. Six of the major types represent approximately 80% of the volume consumed, whereas the remaining 20% is made up of approximately 40 different chemical types. Commercially produced surface active agents are not pure chemicals and within each chemical type there can be tremendous variation. Technical staff who are not familiar with surfactants are frequently bewildered by the enormous variety of different products on the market and the vast body of literature which exists on the composition and properties of surfactants. The selection of the best surfactant for any given use therefore becomes a major problem. This volume arose from the clear need to have available a simple reference book summarising the different types of surfactants on the market and their properties. The concept and structure of the book evolved from early attempts to define chemical structure property relationships of all the different types of surfactants commercially available into a simple handbook providing essential background information for the surfactant user. It is realised that most users will be developing their own data bank of structure end use property relationships and they will therefore be the experts on end use.

Surfactants in Polymers, Coatings, Inks, and Adhesives David R. Karsa, 2020-01-16
Surface active agents are used as process aids in the production of polymers as additives to impart or modify polymer properties and in the formulation and further processing of polymeric systems for a variety of applications. In all these uses the surfactants are used as effect chemicals to impart specific performance characteristics or properties to the base polymer or to enhance its performance when formulated for a specific end use. This volume focuses on those surfactant areas incorporating the greatest number of supplier and user companies. Authors have been selected from leading industrial and academic laboratories around the world. It provides an introduction to the underlying chemistry and technology in these industrial areas and at the same time highlights important recent developments. Surfactants in Polymers, Coatings, Inks and Adhesives is a book for surfactant researchers and for manufacturers and users of surfactants. In particular, surfactant chemists, analytical chemists, environmental chemists, users of surfactant formulations in the fields of specialty chemicals, polymers and detergents, and health and safety personnel.

Surfactants Europa Gordon L. Hollis, 2007-10-31
Surfactants

Europa 3rd Edition provides easy access to current product information on surface active agents surfactants manufactured and sold in Europe It contains valuable data on approximately 9 000 trade names from more than 80 suppliers including chemical description and composition general property application and manufacturer information The directory contains company and trade name indexes with page references and provides a very useful listing of companies with full contact details including European divisions and agents The products listed in the directory find applications in a wide variety of branches of the chemical manufacturing industry including detergent and cleaning products agrochemicals construction cosmetics food oil paint paper pharmaceuticals plastics and textiles The directory is edited by Dr Gordon Hollis an established consultant in the surfactants field and author of four respected surfactants directories Surfactants Europa 3rd Edition will be an essential reference directory for research and development personnel and laboratory staff in general It will also be useful for technical departments and purchasing sales departments not only in the detergent industry but in many industries where surfactants are used

Colloid Science Terence Cosgrove, 2010-02-16 Colloidal systems are important across a range of industries such as the food pharmaceutical agrochemical cosmetics polymer paint and oil industries and form the basis of a wide range of products eg cosmetics toiletries processed foodstuffs and photographic film A detailed understanding of their formation control and application is required in those industries yet many new graduate or postgraduate chemists or chemical engineers have little or no direct experience of colloids Based on lectures given at the highly successful Bristol Colloid Centre Spring School Colloid Science Principles Methods and Applications provides a thorough introduction to colloid science for industrial chemists technologists and engineers Lectures are collated and presented in a coherent and logical text on practical colloid science

Chemistry of Functional Materials Surfaces and Interfaces Andrei Honciuc, 2021-02-19 Chemistry of Functional Materials Surfaces and Interfaces Fundamentals and Applications gives a descriptive account of interfacial phenomena step by step from simple to complex to provide readers with a strong foundation of knowledge in interfacial materials chemistry Many case studies are provided to give real world examples of problems and their solutions allowing readers to make the connection between fundamental understanding and applications Emerging applications in nanomaterials and nanotechnology are also discussed Throughout the book the author explains the common interface and surface equations models methods and applications in the creation of functional materials The goal of Chemistry of Functional Materials Surfaces and Interfaces is to provide readers with the basic understanding of the common tools of surface and interface chemistry for application in materials science and nanotechnology This book is suitable for researchers and practitioners in the disciplines of materials science and engineering and surface and interface chemistry Includes numerous real world examples and case studies throughout Addresses emerging applications of interfacial materials chemistry in nanomaterials and nanotechnology Provides the foundational concepts of surface and interfacial science with models equation and methods

Coated and Laminated Textiles W Fung, 2002-05-09 Coating and

lamination offer methods of improving and modifying the physical properties and appearance of fabrics and also the development of entirely new products by combining the benefits of fabrics polymers and films This detailed book covers all aspects of coating and lamination within the textile industry including compound ingredients how to set and adhere to strictly controlled processing conditions the accurate control of production variables the safe handling of toxic materials and the ongoing research into future products which will facilitate recycling and disposal This book is particularly useful in the insight it gives about the challenges and opportunities that these new treatments offer and is essential reading for technologists chemists and production engineers working in this exciting field Authoritative review of the latest developments in coating and lamination processes for textiles Focuses on the importance of setting and adhering to processing conditions Written by the author of the well known Textiles in automotive engineering
