leadership The book examines how leadership is currently understood primarily from a systems based perspective as an attribute of the individual the leadership role being to articulate values missions and visions and then persuade others to adhere to them It argues for a new view of ethics as co created through identity and difference representing the end of business ethics as we know it today Areas considered include risk and conflict spontaneity and motivation In the past we have focused on the choices of individual leaders In today s highly complex organizations we are now coming to understand the nature of leadership as self organizing and as such closely linked to ethics This means that we can no longer understand ethics simply as centered rational choice in planning and action *Sport Leadership in the 21st Century* Laura J.
