Developmental Perspectives on Teaching and Learning Thinking Skills D. Kuhn, 1990-08-23      **Thinking Skills**

**Instruction** Marcia Heiman, Joshua Slomianko, 1987      Putting it into Practice Paula Jones, Debbie Haydon, 2012-02-01 Most teachers would agree that they teach reasoning skills in their classes. However, are they explicitly incorporating strategies that teach students to think critically? If so, how do they know these methods are effective? The purpose of this book is to summarize and share a variety of methods for developing students' critical thinking skills. Each chapter focuses on a select teacher education class where the instructor implemented components of the Paul and Elder Model of Critical Thinking. Written from the instructor's point of view, each chapter details how each instructor utilized components of the Paul and Elder Model to support students in the development of their critical thinking skills. Importantly, each instructor's use of the model varied, and those variations are shared in detail. Chapter authors found that utilizing components of the Paul and Elder Model resulted in more consistent use of critical thinking skills by students within their teacher education classes. In this practice-based book, interested teachers will be challenged to think through the methods they currently use in their own classes and will be provided new ideas or strategies to try.      Teaching 21 Thinking Skills for the 21st Century Carol Robinson Zanartu, Patricia Doerr, Jacqueline Portman, 2015 Teaching 21 Thinking Skills for the 21st Century: The MiCOSA Model gives K-12 teachers, administrators, staff development coordinators, and school psychologists practical hands-on help for developing students' thinking skills across the curriculum and shows educators how to help students use the information they gain to solve problems and innovate new solutions in today's diverse and challenging classrooms and world.
