Art is Fundamental Eileen S. Prince, 2008 Art Is Fundamental can be used by teachers with extensive art training who must explain complicated concepts to first graders or by teachers or home schoolers with no such background who suddenly find they will be teaching art Eileen Prince has developed a comprehensive art curriculum that can be integrated into any teacher s existing instruction Though written for elementary school teachers these lessons can be easily condensed and adapted for middle or even high school students back cover

Teaching Art Rhian Brynjolson, 2010 This resource is written for classroom teachers art education specialists childcare workers artists working in schools parents who home school their children and school administrators It can also be used as a university textbook for Education students The book provides a framework for teaching art in a way that is integrated with regular classroom practice and mindful of current art curriculum outcomes Although the book focuses on art for primary and middle school students from pre school to grade eight Teaching Art is also useful to art specialists at the high school level who are looking for new strategies or project ideas to add to their established secondary programs Revised and expanded from the author s previous resource Art Illustration This resource integrates new developments in art education

Studio Approach to Teaching Art for the Elementary School Student Brad Moore, 2019-06-11 This book is for the art educator who wants to take a studio approach to the teaching of art While you do not expect to turn all of your students into artists you do want to elevate them to their fullest potential as visual people and make them comfortable in their own skin in terms of demonstrating their ability Another goal is to nurture their appreciation for the visual arts and the hard work and commitment that goes into creating a work of art They may not comprehend the artwork but they can at least appreciate the

work that goes into creating it Drawing and design are like reading and writing is to many of the other disciplines in school I use the word discipline because art is also a discipline It has a relevant body of knowledge and is considered an important part of a classical education Drawing can be compared to reading for as the child attempts to make sense out of the shapes that form the alphabet in order to develop language he constantly makes marks to express himself and formulate a visual language Design has an affinity with writing whereas the child learns to take the alphabet from the spoken word and transcribes that language in to the written word to form sentences and then paragraphs in order to organize thoughts and ideas so as to express himself in a different form Design takes those marks of their visual language and organizes them on a two dimensional surface to give form to those marks in that space Without some grasp of the principles of drawing and design the child may experience difficulty in expressing himself in other areas of the visual arts That is why drawing and design form the building blocks of a strong program in the visual arts Without these two forming the cornerstone of any program in the visual arts the foundation of that program would have an inherent weakness to its structure and overall focus For once students grasp the skills of drawing and design to the best of their ability they are ready to explore the other areas of the visual arts This book will cover Kindergarten through fifth grade It will cover six different areas of the visual arts The first two areas covered on each grade level will be drawing and design After studying these two areas the student can move on to painting I suggest painting simply because of all the two dimensional groundwork that was laid with the initial study of drawing and design From painting it could be appropriate to study sculpture and explore how those principles of design take on a different function in three dimensional forms of art From sculpture one could return to two dimensional art forms by studying such areas as printmaking or printmaking could be done before sculpture With each of these units there will be a list of vocabulary words that if you wish you can expand upon Vocabulary is important because just like other areas have a language so too does art An understanding of this language no matter how rudimentary is essential to understanding the concepts being taught
