*The Essential Guide to Teaching New Apprenticeships* Steve Ingle, 2021-03-24. Practical advice for apprenticeship teachers and trainers. How to support on Understanding the ways in which standards-based apprenticeships are different. Mapping to the Level 4 Assessor Coach apprenticeship standard. Adapting teaching and training approaches for new standards-based apprenticeships. Working with all of the other people involved with apprenticeships. Effective ongoing assessment for vocational learners. Vocational coaching progress monitoring and effective target setting. Planning for the continuing development of professional skills. Delivering a high quality apprenticeship programme. Opportunities and Challenges of Interprofessional Collaboration and Education Jill Thistlethwaite, Peter Musaeus, Martina Mueller-Schilling, Sophie Schlosser, 2024-04-01. Interprofessional collaboration is essential in meeting today's health challenges which demand high flexibility and innovation. Many health organizations including the World Health Organization (WHO) demand that interprofessional collaboration should be taught and learned globally. Even so, interprofessional education tools have not yet been widely implemented in the curricula of medical professions including physicians, nurses, pharmacists, physiotherapists etc. This training usually takes place separately. Collaboration is necessary in health professions education as it can allow professionals to increase their skills and help them achieve more than they would at an individual level. Collaboration also allows for more open-minded approaches when facing new ways of thinking. When knowledge is shared, healthcare employees are more encouraged to share their own ideas and concerns. These achievements of interprofessionalism within health profession education not only benefit the student and employee but also optimize patient care and increase patient safety. Productivity can also be increased and therefore reduce costs overall. *Handbook of Old Age Liaison Psychiatry* George Tadros, George Crowther, 2024-04-11. This essential new handbook provides practical and essential information on old age liaison psychiatry in the general hospital setting for use in everyday practice. Covering the assessment and management of older people's mental health, it addresses the most common day-to-day clinical presentations and conditions. The book provides a unique and valuable insight into the emotional and psychological challenges that older people and their families face in hospital when dealing with both physical health and social crises. Featuring contributions from a range of experts from diverse medical and psychiatric specialities on topics such as service development, use of technology, ethical issues, safeguarding procedures and evidence-based practice for effective management. The book shines a light on the integration of mental and physical health for older people and the importance of managing all aspects of care alongside the impact of each on mental health. An essential guide for hospital clinicians across all specialties. Nursing Care Plans - E-Book Meg Gulanick, Judith L. Myers, 2013-03-01. Updated content incorporates the latest evidence-based data.
