Teaching Democracy:

Teaching Democracy Walter C. Parker, 2003 In *Teaching Democracy* Walter Parker makes a unique and thoughtful contribution to the hot debate between proponents of multicultural education and those who favor a cultural literacy approach Parker conclusively demonstrates that educating for democratic citizenship in a multicultural society includes a fundamental respect for diversity This scholarly yet accessible work Bridges the widening gap between multicultural education and civic education Provides powerful teaching strategies that educators can use to draw children creatively and productively into a way of life that protects and nurtures cultural pluralism and racial equity Explains the unity diversity confusion that is found in popular media as well as in multicultural and citizenship education initiatives Defines deliberative discussion and explores its promise as the centerpiece of democratic education in schools both elementary and secondary At a moment in time when our connection to the nation seems superficial and jingoistic Walter Parker offers us a vehicle to reach our ideal of deliberative committed civic participation for every citizen This book explores the hard work of citizen making in a diverse and complex society where individual and group interests often are in conflict Parker makes us realize that in a democracy public is not a dirty word and schooling should not be punishment Gloria Ladson Billings University of Wisconsin Madison This book deals in an engaging and thought provoking way with both social realities and democratic possibilities exactly what I try to do in my classroom Wendy Ewbank teacher Seattle Girls School

Democracy's Education Harry C. Boyte, 2021-04-30 Today Americans feel powerless in the face of problems on every front Such feelings are acute in higher education where educators are experiencing an avalanche of changes cost cutting new technologies and demands that higher education be narrowly geared to the needs of today's workplace College graduates face mounting debt and uncertain job prospects and worry about a coarsening of the mass culture and the erosion of authentic human relationships Higher education is increasingly seen and

often portrays itself as a ticket to individual success a private good not a public one Democracy s Education grows from the American Commonwealth Partnership a year long project to revitalize the democratic narrative of higher education that began with an invitation to Harry Boyte from the White House to put together a coalition aimed at strengthening higher education as a public good The project was launched at the beginning of 2012 to mark the 150th anniversary of the Morrill Act which created land grant colleges Beginning with an essay by Harry C Boyte Reinventing Citizenship as Public Work which challenges educators and their partners to claim their power to shape the story of higher education and the civic careers of students the collection brings world famous scholars senior government officials and university presidents together with faculty students staff community organizers and intellectuals from across the United States and South Africa and Japan Contributors describe many constructive responses to change already taking place in different kinds of institutions and present cutting edge ideas like civic science civic studies citizen professionalism and citizen alumni Authors detail practical approaches to making change from new faculty and student roles to changes in curriculum and student life and strategies for everyday citizen empowerment Overall the work develops a democratic story of education urgently needed to address today s challenges from climate change to growing inequality

Teaching Democracy by Being Democratic Ted Becker, Richard A. Couto, 1996-10-30 The best way to teach democracy has been the subject of an ongoing debate for 2 500 years Unlike most books about teaching democracy this one spends more time on how to teach democracy than the what and why of teaching democracy It punctures the irony of teaching democracy by lectures and superior teachers In its place this book provides a variety of illustrations for the teaching of democracy in an experiential and egalitarian fashion The introduction presents a theoretical and analytical framework of democracy and democratic pedagogy The six chapters cover topics such as structuring a democratic classroom democratic practices that empower students problem solving and community service that make the classroom a laboratory for democracy and university based programs of democratic alternatives that serve the community The volume s treatment of community organization students as collaborators personal empowerment the community of need and response and the democratic organization expresses its preference for direct democratic participation

Shaffer, 2023-06-23 Contemporary public policy challenges are increasingly called wicked problems or problems that cannot be solved by one sector or one agency of government alone Solutions to wicked problems often further require the recognition and acceptance of tradeoffs or drawbacks which might include a cost or sacrifice for the whole of society or a subsection of society Based on the premise that government of by and for the people is not sufficient to rise to and meet wicked public policy problems this volume provides strategies and ideas for public administration educators across diverse environments as well as undergraduate and graduate education to include and integrate the principles of with the people in public administration education and practice This book explores the ways that notions of governing with citizens can be integrated into courses that focus on public administration and policy It invites instructors to think about what it means to be educators within higher education institutions in a democratic society championing deliberation and engagement as a way to prepare students for professional roles in their communities Each chapter is written by a contributor who has road tested the inclusion of democratic ideals and principles in their own classrooms and each chapter therefore provides blueprints curriculum plans and lesson plans for the integration of democratic principles in public administration education and practice Teaching Democratic Ideals to Public Affairs Students is essential reading for faculty in public administration public policy and political science departments and it will also be a useful guidebook for practicing public administrators as well as those who provide training to practicing administrators and leaders

Schools, Curriculum and Civic Education for Building Democratic Citizens Murray Print, Dirk Lange, 2013-02-12 How can schools and the school curriculum contribute to building democratic citizens This is a major question posed by governments educational systems schools teachers and researchers around the world One important way is to identify the competences needed for preparing democratic citizens and incorporate these within both the formal and informal school curriculum Another question must then be posed what competences do young citizens need to be considered

as active and engaged in modern democracies In 2011 an invited research symposium of leading civic and political educators and social scientists from across Europe met in Hannover Germany to consider this key concern facing Europe today In examining the above questions the symposium addressed two significant issues 1 Identify key competencies required for active citizenship of young people in Europe of the future 2 Translate those competencies to school based activities in the form of curricular and pedagogical strategies The publication Civic Education and Competences for Engaging Citizens in Democracies addressed the first issue and this volume addresses the second issue Through discussion in the invited symposium previously prepared papers and participation in a modified Delphi Technique the participants have prepared chapters for this book The chapters of this book represent the contribution of the participants before during and after the symposium with opportunities for review and reflection about competences for democratic citizenship and the role of schools and the curriculum Murray Print and Dirk Lange are professors from the University of Sydney and Leibniz University of Hannover respectively and are national leaders in civics and citizenship education in their respective countries They have brought together a group of leading European civic and citizenship educators from different academic fields to explore the key issue and to identify the competences for young people to become active and engaged European citizens Investing in our Education Alison Taysum, Stephen Rayner, 2014-10-31 This book is an edited collection of chapters from academic leaders and doctoral researchers in the field that records a coherent journey through the purposes pedagogies and impact of doctoral study as a key contributing force in managing education for the public good Education and Humanism Wiel Veugelers, 2011-11-16 Human beings have the possibility to give meaning to their lives and to create coherence in experiences Present day humanism strongly focuses on personal development in relation to others It is this tension between personal development and advancement of humanization that is creating the opportunities for the personal development of every world citizen Humanism is about personal autonomy moral responsibility and about solidarity with humanity The tension between autonomy and social involvement is the core of humanism Education can support persons in their moral and personal identity development The authors brought together in this book all address issues of developing autonomy and humanity in educational practices All the chapters try to link theory and practice They either make theoretical ideas more practical or they use practical experiences and concerns to rethink theoretical notions Together the chapters in the book give a broad overview of theoretical foundations concrete research and practices in education The book shows a diversity that can inspire scholars and practitioners in further developing their perspectives Creating meaning is an essential part of all education Focusing on the linking of autonomy and humanity is the humanist perspective in it **Catalog of ERIC Clearinghouse Publications** ,1997 Educational Scholarship across the Mediterranean ,2021-10-25 The Mediterranean has once again come into its own in global geo politics attracting international interest that goes well beyond the typical stereotypes propagated by the tourist industry Popular movements clamouring for democracy conflict zones that have a spill

over effect well beyond the region efforts to engage with globalisation on its own terms one and all play out in various sectors of society education included Educational Scholarship across the Mediterranean A Celebratory Retrospective brings together in one volume a selection of the best articles that have appeared in the Mediterranean Journal of Educational Studies whose first issue was published in 1996 Each chapter highlights challenges faced by education systems across the region seen from the perspective of leading scholars who draw on original empirical data a broad spectrum of theoretical frameworks and personal experience to reflect on education related topics Among these we find critical considerations of the role of the economy demography gender social stratification religion politics culture and language in shaping educational systems and practices Much has been achieved in the countries bordering on the Mediterranean over the past 25 years and yet a consideration of the continuities as much as of the ruptures is instructive showing how education remains both a transformative and reproductive force in communities
