Handbook of English Language Education in Bangladesh Shaila Sultana, M. Moninoor Roshid, Md. Zulfegar Haider, Mian Md. Naushaad Kabir, Mahmud Hasan Khan, 2020-12-17 This Handbook is a comprehensive overview of English language education in Bangladesh. Presenting descriptive theoretical and empirical chapters as well as case studies, this Handbook on the one hand provides a comprehensive view of the English language teaching and learning scenario in Bangladesh and on the other hand comes up with suggestions for possible decolonisation and de-eliticisation of English in Bangladesh. The Handbook explores a wide range of diverse endogenous and exogenous topics all related to English language teaching and learning in Bangladesh and acquaints readers with different perspectives operating from the macro to the micro levels. The theoretical frameworks used are drawn from applied linguistics, education, sociology, political science, critical geography, cultural studies, psychology, and economics. The chapters examine how much generalisability the theories have for the context of Bangladesh and how the empirical data can be interpreted through different theoretical lenses. There are six sections in the Handbook covering different dynamics of English language education practices in Bangladesh: from history, policy, and practice to assessment, pedagogy, and identity. It is an invaluable reference source for students, researchers, and policy makers interested in English language, ELT, TESOL, and applied linguistics.

Task-based Language Teaching and Beyond: L2 Pragmatics Instruction for Young Learners Tomasz Róg, 2025-05-28 This book provides a groundbreaking exploration of how task-based language teaching (TBLT) can effectively develop second language (L2) pragmatic competence in young learners. Bridging the gap between TBLT and L2 pragmatics, this volume addresses critical issues in language education, offering insights into teaching key speech acts. Specifically, it compares the outcomes of TBLT with the traditional PPP framework in teaching L2 speech acts to Polish learners of L2 English aged 8 to 9. Chapter 1 deals with pragmatics and pragmatic competence, highlighting its importance in effective communication and language use in social contexts. It addresses L2 pragmatics, the development of L2 pragmatic competence, and the challenges in teaching and assessing this competence. Chapter 2 overviews TBLT, its theoretical foundations, practical implementation, and related empirical research. It discusses the cognitive interactionist and sociocultural perspectives on L2 acquisition and the effectiveness of tasks. Chapter 3 reviews empirical research on using tasks in teaching L2 pragmatics, especially to young learners. Chapter 4 details the research methodology used in the study, including the context, participants, target speech acts, data elicitation instruments, and analysis procedures. Chapter 5 presents the results of the study. Chapter 6 discusses the findings, their pedagogical implications, and the limitations of the study. Chapter 7 offers conclusions, rich with pedagogical implications. The volume is an essential resource for researchers and practitioners interested in task-based and task-supported teaching, L2 pragmatics, and innovative approaches to teaching young learners.

When Dead Tongues Speak John Gruber-Miller, 2006-11-02 *When Dead Tongues Speak* introduces classicists to the research that linguists, psychologists, and language teachers have conducted over the past thirty years and passes along their most important insights. Transformative Pedagogical Perspectives on Home Language Use in Classrooms Jules, Janice E.,Belgrave, Korah L.,2020-09-25

Linguists researchers and other practitioners in language education acknowledge that the resolution of language problems associated with breaking down language and cultural barriers that hinder the growth of learners self identities and national identities is ongoing In fact even with decades of research in home language use in the classroom there are still classrooms worldwide where learners are deprived of the opportunity of building their self esteem confidence and autonomy by communicating with their native language The global nature of communication requires speakers to use all the languages in their repertoire effectively thus reinforcing the need to encourage home language use in classrooms Transformative Pedagogical Perspectives on Home Language Use in Classrooms is a cutting edge research publication on the effective use of home language in the classroom that emphasizes the significance of this activity to the success of the overall language development of the learner Particular attention is given to transformative pedagogy and the provision of valuable insights into how the teacher can guide and assist learners in the development of critical thinking skills In addition the book provides content that enables practitioners in language education and parents to explore their roles in assisting children in breaking down the language and cultural barriers that hinder the growth of their self identity and national identity Highlighting topics such as engineering education cultural responsiveness and transformative pedagogy this book is essential for linguists academicians education professionals curriculum designers policymakers administrators instructional designers researchers and students

Tutorials in Bilingualism Annette M.B. de Groot,Judith

F. Kroll, 2014-05-12 The past fifteen years have witnessed an increasing interest in the cognitive study of the bilingual A major reason why psychologists psycholinguists applied linguists neuropsychologists and educators have pursued this topic at an accelerating pace presumably is the acknowledgment by increasingly large numbers of language researchers that the incidence of monolingualism in individual language users may be lower than that of bilingualism This alleged numerical imbalance between monolinguals and bilinguals may be expected to become larger due to increasing international travel through for instance tourism and trade to the growing use of international communication networks and to the fact that in some parts of the world i e Europe the borders between countries are effectively disappearing In addition to the growing awareness that bilinguals are very common and may even outnumber monolinguals there is the dawning understanding that the bilingual mind is not simply the sum of the cognitive processes associated with each of the two monolingual modes and that the two languages of bilingual may interact with one another in complicated ways To gain a genuinely universal account of human cognition will therefore require a detailed understanding of language use by both pure monolinguals as well as bilinguals unbalanced and balanced and of the representations and processes involved These two insights that bilingualism is a common human condition and that it may influence cognition were presumably instrumental in putting bilingualism on the agendas of many researchers of cognition and language in recent years But other reasons may have played a role too The study of bilingualism also provides a unique opportunity to study the relation between language and thought A final reason for the growing interest in this area of research is the awareness that bilingualism may confer the benefit of broadening one s scope beyond the limits of one s own country and culture This book serves as an excellent introduction to the important topics in the psycholinguistic study of bilingualism The chapters represent a comprehensive and interrelated set of topics that form the core of contemporary research on the psycholinguistics of bilingualism The issues raised within this perspective not only increase our understanding of the nature of language and thought in bilinguals but also of the basic nature of the mental architecture that supports the ability to use more than one language
