## **Teaching Secondary Scientific Enquiry And Science Practice:**

**Science Education Research and Practice in Asia-Pacific and Beyond** Jennifer Yeo, Tang Wee Teo, Kok-Sing Tang, 2017-10-16 This book is based on presentations at the International Science Education Conference ISEC 2014. It showcases a selection of the best papers by researchers and science teachers from the Asia Pacific region, North America and the United Kingdom. Centered on the theme of Pushing the boundaries Investing in our future they pursue new ways of helping learners appreciate the diversity and changes in science that result from a globalised world facing complex and diverse environmental and technological issues. The chapters touch on various themes in science education that explore and investigate issues of scientific literacy, societal challenges and affect and teacher professional development. Its comprehensive themes make it a valuable textbook for graduate students of master's and Ph.D. programs. It also appeals to pre-service and in-service teachers as a resource on innovative pedagogical practices and creative methods of professional development. With a selection that emphasises the research-practice nexus in education research, it serves as an introductory handbook for teachers to connect with the current issues facing science education.

**Learning to Teach Science in the Secondary School** Jenny Frost, Tony Turner, 2005 The second edition of this popular student textbook presents an up-to-date and comprehensive introduction to the process and practice of teaching and learning science. It takes into account changes in science education since the first edition was published, including more recent curriculum reform. This new edition builds upon the success of its predecessor, introducing new material on the use of ICT in science teaching, as well as providing sound, informative and useful discussion on managing your professional development, knowledge, concepts and principles of science planning for learning and teaching in science, practical teaching strategies, selecting and using resources, assessment and examinations and the broader science curriculum.

Learning to Teach Science in the Secondary School Rob Toplis, Jenny Frost, 2010-04-15 Learning to Teach Science in the Secondary School now in its third edition is an indispensable guide to the process and practice of teaching and learning science. This new edition has been fully updated in the light of changes to professional knowledge and practice, including the introduction of master level credits on PGCE courses and revisions to the national curriculum. Written by experienced practitioners, this popular textbook comprehensively covers the opportunities and challenges of teaching science in the secondary school. It provides guidance on the knowledge and skills you need and understanding the science department at your school, development of the science curriculum in two brand new chapters on the curriculum 11-14 and 14-19, the nature of science and how science works, biology, chemistry, physics and astronomy, earth science, planning for progression, using schemes of work to support planning and evaluating lessons, language in science, practical work using ICT, science for citizenship, Sex and Health Education and learning outside the classroom, assessment for learning and external assessment and examinations. Every unit includes a clear chapter introduction, learning objectives, further reading lists of useful resources and specially designed tasks, including those to
