**Teaching Children with Behavior Disorders: Personal Perspectives** James M. Kauffman, Clayton D. Lewis, 1974-01-01     The Unteachables Keith A. Mayes, 2023-01-24 How special education used disability labels to marginalize Black students in public schools The Unteachables examines the overrepresentation of Black students in special education over the course of the twentieth century As African American children integrated predominantly white schools many were disproportionately labeled educable mentally retarded EMR learning disabled LD and emotionally behavioral disordered EBD Keith A Mayes charts the evolution of disability categories and how these labels kept Black learners segregated in American classrooms The civil rights and the educational disability rights movements Mayes shows have both collaborated and worked at cross purposes since the beginning of school desegregation Disability rights advocates built upon the opportunity provided by the civil rights movement to make claims about student invisibility at the level of intellectual and cognitive disabilities Although special education ostensibly included children from all racial groups educational disability rights advocates focused on the needs of white disabled students while school systems used disability discourses to malign and marginalize Black students From the 1940s to the present social science researchers policymakers school administrators and teachers have each contributed to the overrepresentation of Black students in special education Excavating the deep seated racism embedded in both the public school system and public policy The Unteachables explores the discriminatory labeling of Black students and how it indelibly contributed to special education disproportionality to student discipline and push out practices and to the school to prison pipeline effect     *Systematic Intervention with Disturbed Children* Marvin J. Fine, 2012-12-06 Disturbed children constitute a sizeable and varied percentage of the child population Generally two to three percent have severe longstanding problems and 20 to 30 percent have current more transient problems While preventive efforts are needed it also seems obvious that many children will continue to function in a disturbed and disturbing fashion and will continue to require various kinds of therapeutic interventions These interventions will mainly occur in school and community settings This book attempts to present a picture of some fairly popular models of intervention and to consider important related issues There are probably as many ways of coping with disturbed children as there are creative caring persons attempting to do the coping A growing literature exists on ways of conceptualizing and intervening with such children It was believed by the editor that an organized body of information on these concepts and techniques would prove useful to student and practitioner A danger with such collections is that if they mainly portray novel or atypical techniques while informative the book quickly becomes passe and of limited value This book's focus is on contemporary thought but also on orientations that have stood the test of some time and the stability of the underlying theory     Issues in Educational Placement James M. Kauffman, Daniel P. Hallahan, Terry A. Astuto, John Wills Lloyd, 2019-08-07 Placement of students with disabilities in the least restrictive environment has become a central issue in special education To date no comprehensive

treatment of placement issues is available especially for students with emotional and behavioral disorders who present particularly difficult placement problems This book combines data and discussions intended to further the understanding of how and why decisions are made to place students with emotional or behavioral disorders in particular educational environments This volume establishes the problem of placement in a contemporary and historical context reviews the literature on placement of students with emotional or behavioral disorders and discusses placement options and concerns about multicultural issues post secondary education law and regulation demands on teachers and policy choices Its goals are to improve understanding of decision processes leading to placement set the stage for improvements in pupils lives in school and elsewhere and stimulate research on the many placement issues that are left unresolved Educating Children and Adolescents with Behavioral Disorders Joseph V. Kauffman, Jeanmarie Badar, 2018-05-16 The Scandalous Neglect of Children's Mental Health What Schools Can Do makes the case that children with mental health needs are under identified and under served by schools and other agencies After reading this brief but powerful book you will better understand the nature of children's mental health needs and the need for expanded services for children in schools and communities The risks and benefits of treatment especially early intervention are discussed and guidelines for action by teachers parents and others are provided The sad fact is that many people do not understand that most young people with mental health needs never receive any treatment of any kind and most of those who receive any treatment at all receive those services only in schools
