Discerning Critical Hope in Educational Practices Vivienne Bozalek,Brenda Leibowitz,Ronelle Carolissen,Megan Boler,2013-12-04 How can discerning critical hope enable us to develop innovative forms of teaching learning and social practices that begin to address issues of marginalization privilege and access across different contexts At this millennial point in history questions of cynicism despair and hope arise at every turn especially within areas of research into social justice and the struggle for transformation in education While a sense of fatalism and despair is easily recognizable establishing compelling bases for hope is more difficult This book addresses the absence of sustained analyses of hope that simultaneously recognize the hard edges of why we despair The volume posits the notion of critical hope not only as conceptual and theoretical but also as an action oriented response to despair Our notion of critical hope is used in two ways it is used firstly as a unitary concept which cannot be disaggregated into either hopefulness or criticality and secondly as an analytical concept where critical hope is engaged and diversely theorized in ways that recognize aspects of individual and collective directions of critical hope The book is divided into four sub sections Critical Hope in Education Critical Hope and a Critique of Neoliberalism Critical Race Theory Postcolonial Perspectives on Critical Hope Philosophical Overviews of Critical Hope Education can be a purveyor of critical hope but it also requires critical hope so that it as a sector itself can be transformative With contributions from international experts in the field the book will be of value to all academics and practitioners working in the field of education *Between insecurity and hope* Maria Pisani,Tanya Basarab,Barbara Giovanna Bello,Sofia Laine,2018-12-15 Youth work can offer a space for young refugees to express themselves and participate in society This Youth Knowledge book presents theoretical references and reflections on the experiences of young refugees and the way they reconcile personal hope with the tensions within their host societies It also explores learning from practices and their theoretical underpinnings concerning the role of youth work in a cross sectoral approach This book aims to be a reference for policy makers practitioners and researchers in the youth field and stakeholders from other sectors working on inclusion access to rights and the participation of young refugees All the contributors propose a very critical engagement with the reality of young refugees in today s Europe where tolerance levels for negative phenomena such as human rights violations hate speech and discrimination are on the rise However there is also an underlying message of hope

for those willing to engage in a human rights based youth work practice that ensures safe spaces for being young no matter who no matter where Practices and reflections deal with democracy activism participation formal and non formal education and learning employment trauma waitinghood and negotiating identities We hope this book as a whole and each individual contribution will inspire youth policy makers and practitioners to take on board the complex realities of unfinished transitions and borderland experiences and create a positive environment for an enriched and transformed youth work for the inclusion of young refugees in their host communities

Community Engagement and the COVID-19 Pandemic Tawnya Azar, 2025-06-24 Community engaged CE teaching is not a new concept However in the past several years it has gained increased emphasis as is evident by the changes to institution mission statements and the allocation of institution resources to support faculty development in CE teaching as well as to support CE coursework and research The arrival of the COVID 19 pandemic forced many faculty members to pivot to an all online instruction model impacting community engaged teaching and research in both predictable and unexpected ways Community partners facing similar struggles to serve their communities with restrictions on face to face interaction were often too overwhelmed to work with higher education volunteers Legally universities could not ask students to risk their health with face to face community engagement In fact the number of CE courses decreased dramatically in 2020 and 2021 due to the unique challenges posed by the pandemic At the same time the pandemic presented some CE faculty with new opportunities for community engagement Some responded swiftly to the immediate needs of the local regional or national community with which they worked taking advantage of the affordances of digital technology or capitalizing on the issues that the pandemic itself created or exacerbated This collection captures the incredible work of pivoting and innovating in community engaged teaching With a primary focus on community engaged teaching in higher education this collection explores how faculty students and community partners navigated their work during the COVID 19 pandemic Additionally it raises important questions about how we might stay engaged with community during a crisis

Theory and Practice of Dialogical Community Development Peter Westoby,Gerard Dowling,2013-07-18 This book proposes that community development has been increasingly influenced and co opted by a modernist soulless rational philosophy reducing it to a shallow technique for solving community problems In contrast this dialogical approach re maps

the ground of community development practice within a frame of ideas such as dialogue hospitality and depth For the first time community development practitioners are provided with an accessible understanding of dialogue and its relevance to their practice exploring the contributions of internationally significant thinkers such as P Freire M Buber D Bohm and H G Gadamer J Derrida G Esteva and R Sennett What makes the book distinctive is that first it identifies a dialogical tradition of community development and considers how such a tradition shapes practice within contemporary contexts and concerns economic social political cultural and ecological Second the book contrasts such an approach with technical and instrumental approaches to development that fail to take complex systems seriously Third the approach links theory to practice through a combination of storytelling and theory reflection ensuring that readers are drawn into a practice theory that they feel increasingly confident has been tried and tested in the world over the past 25 years *Community Education and Neoliberalism* Camilla Fitzsimons, 2017-03-01 This book explores community education in Ireland and argues that neoliberalism has had a profound effect on community education Rather than retain its foundational characteristics of collective equality led principles and practices community education has lost much of its independence and has been reshaped into spaces characterised by labour market activation vocationalisation and marketisation These changes have often though not always run contrary to the wishes of those involved in community education creating enormous tensions for practitioners course providers and participants **Community Education for Social Justice** Cameron White, 2014-02-05 What is community How important is community in the 21st century Where might the idea of community fit in education and schooling teaching and learning These are the questions and themes embedded in this book The general critique is that community is an add on in our schools and often is dismissed as a result of the individualistic and competitive nature of schooling today Our focus is to provide critical investigations as to the possibility of community and that we need community now more than ever The concept of community education brings many ideas and issues to mind Related themes include place based field based environmental service learning and outdoor education Each has its own more narrow focus with community education perhaps an umbrella term than encompasses them all Nevertheless the suggestion here is that instead of community education serving as an extension or add on to traditional approaches it should be the focus of all education What is often missing in teaching and learning are contexts and connections that make education meaningful Community education engages participants in problem and issues based approaches to the local community thereby facilitating that local to global link Instead of compartmentalized subjects integrated approaches use what students and the community know or understand to develop further questions solutions or even problems Community education offers efficacy in that it provides opportunities for collaboration in addressing local issues and problems It enables the community to become the classroom thus ensuring a more long term connection to active rather than passive endeavors as citizens **Reconceptualizing Faculty Development in Service-Learning/Community Engagement** Becca Berkey, Emily Eddins Rountree, Patrick M.

Green, Cara Meixner, 2023-07-03 The role of educational developer in the realm of service learning and community engagement S LCE is multidimensional Given the potentially transformational nature for both faculty and students of the experiences and courses in whose design they may be directly or indirectly involved as well as their responsibility to the communities served by these initiatives they have to be particularly attentive to issues of identity values and roles As both practitioners and facilitators they are often positioned as third space professionals This edited volume provides educational developers and community engagement professionals an analysis of approaches to faculty development around service learning and community engagement Using an openly self reflective approach the contributors to this volume offer an array of examples and models as well as realistic strategies to empower readers to evolve their faculty development efforts in service learning and community engagement on their respective campuses It is also a call for recognition that the practice of S LCE needs to be institutionalized and improved The book further addresses the field s potential contributions to scholarship such as the scholarship of teaching and learning SoTL publicly engaged scholarship and collaborative inquiry among others The case studies provide an outline of program models and promising practices including an authentic analysis of the institutional context within which they operate the positionality of the practitioner scholars overseeing them the resources required and the evidence related to both successes and challenges of these approaches The contributed chapters are organized under four themes the landscape of faculty development and community engagement models of faculty development in S LCE challenges and opportunities in pedagogy and partnerships and engendering change in educational development
