Teaching Introductory Psychology Survival Tips From The Experts:

Teaching Introductory Psychology Robert J. Sternberg, 1997-01-01 The editor's goal in compiling this book was to invite authors to articulate their philosophies, course designs and teaching techniques for the introductory psychology course. The authors were told to write a chapter for all introductory psychology teachers and to address how the teaching of introductory psychology could be made more rewarding to students and teachers alike. A few authors comment specifically on the writing process of introductory textbooks and the parallels they have found between the classes they teach and the material they write. It is hoped that these chapters help to shed light on any introductory textbook's underlying purpose, goals and organization and thus enable teachers to use these essential texts more effectively. [A Guide to Teaching Introductory Psychology](#)

Sandra Goss Lucas, 2009-01-22 [A Guide to Teaching Introductory Psychology](#) focuses on the critical aspects of teaching introductory psychology to undergraduate students. It includes ideas, tips and strategies for effectively teaching this course and provides useful answers to commonly asked questions. A concise and accessible guide to teaching introductory courses in Psychology. Begins with an orienting history of the course. Evaluates current trends in teaching and offers suggestions for developing personal techniques. Addresses a number of relevant issues including how to teach difficult topics, linking course content to everyday experience, developing and using class presentations, lectures and active learning ideas and increasing interest in course topics. Supported by a website that provides links to useful websites and handouts that instructors can use in their classes. <http://www.blackwellpublishing.com/teachpsychscience/lucas> **Handbook for**

Teaching Introductory Psychology Michelle Rae Hebl, Charles L. Brewer, Ludy T. Benjamin, Jr., 2001-08-01 Like its predecessors, Volume III of the Handbook for Teaching Introductory Psychology provides introductory psychology instructors with teaching ideas and activities that can immediately be put into practice in the classroom. It contains an organized collection of articles from Teaching of Psychology TOP, the official journal of the Society for the Teaching of Psychology, Division 2 of the American Psychological Association. Volume III contains 89 articles from TOP that have not been included in other volumes. Another distinction between this volume and its predecessors is its emphasis on testing and assessment. The book is divided into two sections. Section One, Issues and Approaches in Teaching Introductory Psychology, contains 52 articles on critical issues such as how to approach the course, understanding students' interests, perceptions and motives, students' existing knowledge of psychology including their misconceptions, a comparison of introductory textbooks and tips on how to evaluate them, test questions and student factors affecting exam performance, an overview of different forms of feedback, giving extra credit and how to deal with academic dishonesty. Section Two consists of 37 articles that present demonstrations, class and laboratory projects and other techniques to enhance teaching and learning in both the introductory as well as advanced courses in the discipline. This section is organized so as to parallel the order of topics found in most introductory psychology textbooks. Intended for academicians who teach the introductory psychology course and/or oversee

grad assistants who teach the course all royalties of the book go directly to the Society for the Teaching of Psychology to promote its activities to further improve the teaching of psychology

Investigating the Stanford Prison Experiment Thibault Le Texier, 2024-08-08 In 1971 psychologist Philip Zimbardo ran the now famous Stanford prison experiment to show that prison could make normal people behave in pathological ways Based on the first thorough investigation in the archives of the experiment and on interviews

with about half of its participants this book shows that the Stanford prison experiment is far from being scientific In particular the guards knew what results were expected from them they were trained and supervised by the experimenters and they were following a schedule and a set of rules written by the experimenters The experimenters deceived the guards and made them believe they were not subjects They also borrowed many elements from a previous student experiment without disclosing this information in their reports The prisoners were not allowed to leave the experiment at will and they were conditioned by the experimenters The mock prison situation was unrealistic Most participants did not forget they were participating in an experiment and many responded to demand characteristics The data was not collected properly And the conclusions were pre written according to non academic aims This book goes beyond the experiment to provide ample background and context in order to understand how the experiment was planned financed recorded and divulged in the press and within the academic It discusses also the role played by Philip Zimbardo in the trial of one of the guards of Abu Ghraib as well as the impact of mass media on science the debates between personal psychology and social psychology and the specific nature of cold war social science
