Learning in the Secondary School Ann Shelton Mayes, Bob Moon, 2016-12-22 Research and writing on secondary education is often a specialised treatment of isolated themes. This reader draws together the most significant work of recent years across a whole range of themes to give students and new teachers an overview of some of the most important issues and challenges that faced secondary teachers in the 1990s. It looks at the central players: the children and the teachers at the classrooms in which they work together at the curriculum both implicit and overt and at the wider community and political context of secondary education. Divided into sections to allow easy access to material of interest, the book covers learners, teachers, classrooms, curriculum, schools. Throughout the reader addresses the crucial issues of effectiveness, quality and achievement and how these will influence the work of the secondary teacher in the coming years **Preparing to Teach in**
