*Teaching Mathematics in Rudolf Steiner Schools* Ron Jarman, 1998-06 A resource book for Waldorf teachers which covers the Class 1 to 8 Steiner Waldorf maths curriculum Features include how arithmetic can be introduced effectively in the early years so you can start teaching with confidence Draws number work from everyday life to stimulate children s interest and enthusiasm Gives examples for you to devise your own exercises Indicates how mixed ability teaching can be improved Relates maths to other subjects and to children s development

*Teaching Waldorf Mathematics in Grades 1-8* Ron Jarman, 2020-08-10 Time tested for over 100 years by Waldorf teachers this resource draws number work from everyday life to stimulate children s interest and shows how children can easily grasp math principles so that educators are relieved of endless worksheets

**Teaching Mathematics for First and Second Grades in Waldorf Schools** Ernst Schuberth, 1999 For Waldorf teachers math is often one of the more difficult subjects to teach On the one hand memories of our own schooldays can cloud our view of children s developmental needs whereas on the other hand Steiner s many indications do not form a cohesive structure for the math curriculum Thus many different ways of teaching were developed during the seventy year history of Waldorf education This diversity underscores the responsibility teachers carry for their lessons This guide does not in any way intend to diminish this responsibility but seeks to contribute to a unified view of Steiner indications for a developmentally appropriate math curriculum Our approach may differ from some existing programs mainly in its direct and quick beginning to math activities and its avoidance of pictures when introducing numbers to young students There may be other differences as well

**Rhythms of Learning** Rudolf Steiner, 1998 Key lectures on children and education have been thoughtfully chosen from the vast amount of material by Steiner and presented in a context that makes them approachable and accessible In his many discussions and lectures Steiner shared his vision of an education that considers the spirit soul and physiology in children as they grow

Rosenstein,2000 A collection of articles written by experienced primary secondary and collegiate educators It explains why discrete mathematics should be taught in K 12 classrooms and offers guidance on how to do so It offers school and district curriculum leaders material that addresses how discrete mathematics can be introduced into their curricula     A Life with Colour Caroline Chanter,2021-10-28 A Life with Colour is the first complete survey of Gerard Wagner s biography and his artistic intentions featuring dozens of illustrations and more than 120 colour plates The life and work of Gerard Wagner 1906 1999 were closely aligned to the artistic spiritual stream connected with the Goetheanum in Dornach Switzerland He first heard of the Goetheanum and of its destruction by fire at New Year 1922 23 whilst still a youth In 1926 he made his first visit to Dornach but his intended stay of a week turned into a lifelong sojourn of over 73 years He found there an active striving

community with which he felt intimately connected From the start Gerard Wagner immersed himself in the various artistic impulses that Rudolf Steiner had instigated This together with an intensive study of anthroposophy formed the basis upon which he forged his own approach to painting The many years he spent in colour experimentation led him to discover objective principles within the language of colour and form that are an inspiration to many today His paintings first shown at the Goetheanum in the early 1940s were exhibited internationally most notably at the Menshikov Palace Hermitage Museum St Petersburg Russia in 1997 Wagner s whole being bowed before the mystery of colour in a loving joyful yet serious way full of devotion and dignity His life and work itself became a living metaphor of the creative power of colour Christian Hitsch Caroline Chanter has not only accomplished a great and seminal study that illuminates the life and work of Gerard Wagner but has done a great service also to the Goetheanum and its School of Spiritual Science Peter Selg Gerard Wagner was a soul which on earth was devoted so selflessly and in such purity to the beings that are revealed in forms and colours He helped them to utterance and manifestation in this world of ours Sergei O Prokofieff Education and Modern Spiritual Life Rudolf Steiner,1989-11 These lectures form one of the most comprehensive introductions to the philosophy of Waldorf education See also A Modern Art of Education **Making Math Meaningful** Jamie York,Nettie Fabrie,Wim Gottenbos,2019-05-31 How to Make Math Meaningful That is one of the greatest challenges for math teachers particularly in today s world This Waldorf math curriculum guide provides a developmentally appropriate method for teaching math in grades one through five

**Teaching as a Lively Art** Marjorie Spock,1985 The author an experienced Waldorf teacher and eurythmist radiates her enthusiasm and sense for beauty as she takes us through the various stages of development of the child She shows us that ripeness is all that nothing can be taught to the child until it is ready to receive it or knowledge will sprout prematurely and wither early This book will help us approach the child with sensitivity and insight *Early Childhood Education* Kimberly A. Roundtree Henderson,Alicia Valero-Kerrick,2013-01-02 An intro text for early childhood students helping them enhance their professional practice through the application of educational and developmental theory and research **Introduction to Waldorf Education** Earl J. Ogletree,1979 **Engaged Community** John McAlice,2013-12-01 Based on many years working in Anthroposophy and in Waldorf schools and drawing extensively on Rudolf Steiner s words Jon McAlice s radical thought provoking book opens the field for a new vision of the collaborative possibilities available in schools that are established and sustained by parents and teachers for the sake of students Seeking to shift the conversation concerning school governance from a structural to a dynamic approach McAlice emphasizes learning as a multileveled process of becoming As he puts it a school is a working community dedicated to the art of becoming a community in which students and adults participate in the difficult task of creating a free self governing ecology of learning For this the adults must learn to trust one another and develop confidence in collegiality Understanding the guidance of their common task they must find the humility and honesty to listen without judgment and to speak with

authenticity To create a context in which children can practice the art of self education educators must themselves become examples of self governing creative responsible human beings committed to learning and self development through encounters in which content and process merge in an experience of absolute freedom Thus something new becomes possible McAlice shows how such an ideal can become a reality when parents teachers and students all work and learn together for the common goal of becoming more fully human within a dynamic engaged participatory learning community Engaged Community provides anyone involved in Waldorf education with the appropriate tools and language to take the hard work of dialog and conversation to a higher level
