Teaching Morality And Religion:

Teaching Morality and Religion Alan Harris, 2018-12-07 First published in 1976 It can be argued that both moral and religious education are undervalued in schools The author Alan Harris believes that too many people think of them as indoctrinatory subjects with moral educators telling people what they ought to do and religious educators telling them what they ought to believe By a combination of practical examples of both good and bad teaching from the classroom and clear analytical examination of what is meant by moral and religious education the author shows that the object of both subjects should be to help pupils form their own judgements The Use of Motives in Teaching Morals and Religion Thomas Walton Galloway, 1917

Speaking of Teaching Gabriel Moran, 2010-02-01 Speaking of Teaching Lessons from History focuses on teaching as a fundamental act of all human beings viewing the question of teaching through the lens of five famous thinkers and two contemporary problems Moran argues that teaching is not given the attention that it deserves and proposes to situate school teaching in the context of many forms of teaching Tracing the history of the idea of teaching from Socrates to Wittgenstein in the first several chapters this book also examines the intricacies of teaching morality and religion showcasing society's ambivalence about teaching

"Moral Order" and The Criminal Law O. Lee, T.A. Robertson, 2012-12-06 XIV Seen as a whole however I regard the work before us to be especially noteworthy precisely because of its illumination of both the social contexts surrounding the law and the ideas which underlie the efforts towards criminal law reform An analysis of this kind has not appeared until now to my knowledge even in the German literature on the subject so that this book is of great value to the German reader as well as the American B Particulars In Chapter IV A the authors give a general introduction into the development of the German criminal law reform In that connection they recognize the special role of the Christian Democratic CDU Socialist SPD coalition in the political situation leading to passage of the reform law The authors emphasize the importance of the introduction of a uniform prison sentence that is to say the termination of the distinction between kinds of prison sentences and the elimination of short term prison sentences as the main points of the reform in the general part of the code They remark pages 170 192 that a uniform concept of the goal of punishment is still lacking although when all is said there is a general agreement on the principle of resocialization

Learning Morality, Inequalities, and Faith Hansjörg Dilger, 2021-12-16 Examines how learning and teaching morality in Tanzania's faith oriented schools is inextricably interwoven with the complex power relations of an interconnected world The Philosophy of Education (RLE Edu K) Harry Schofield, 2013-05-13 There are many students who find philosophy of education difficult because they have never received teaching in the basic essentials of general philosophy This book begins by asking the basic question what is philosophy and examines a number of possible answers Step by step the reader is introduced to the modern techniques of linguistic and concept analysis Whenever a technical term is used it is explained and illustrated by reference to familiar situations in everyday life Pamphlets on British Education, 1714-1873, 1846 *The Use of Motives in Teaching*

Morals and Religion Thomas Walton Galloway, The Pilgrim Press, 2023-07-18 This classic book explores the use of motives as a tool for teaching morals and religion Drawing on examples from literature and everyday life the author demonstrates how motives can be used to inspire ethical behavior and deepen spiritual understanding Thought provoking and insightful it is a must read for anyone interested in education or spirituality This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant **The True Remedy for the Evils of the Age** John Howard Hinton, Julius Charles Hare, Richard Dawes, Thomas Wrigley, W. Robert Ingram, J. Gresham Machen, Henry Manne, Zach Montgomery, Tommy Rogers, Dorothy Sayers, T. Van Der Kooy, By every known academic measurement government subsidized secular compulsory education is a massive failure and getting worse Yet the American public continues to believe that government financed education is moral useful and basically a great economic bargain Whose Kids Are They Anyway? Raymond R. Roberts, 2010-11-01 Raymond R Roberts makes a liberal s case for teaching religion and morality in public schools by first examining the intersection of religion and public education He shows how proposals for moral education in public schools are shaped by definitions of religion He argues that the public education s critics overstate the failures of public education because they examine public schools in isolation from negative trends in the family the economy the media etc From there he describes how a theory of spheres of influence gives us a better perspective from which to understand public education including its relationship with religion **The Connecticut School Journal**, 1902 **The Contemporary Review**, 1874 **The Use of Motives in Teaching Morals and Religion** Thomas Walton Galloway, 2015-06-02 Excerpt from *The Use of Motives in Teaching Morals and Religion* 1 The meaning of pedagogy Pedagogy merely means the science of teaching The word indicates that teaching human beings may be reduced to a science This implies that results are produced by definite causes in personality and character just as in physics and chemistry and medicine The idea is that in education one must know what results are desired and what elements he has to work with before he can go intelligently about finding a method of work All this means that the structure of human personality is not lawless but is definite and can be discovered by study It means that character grows and matures in an orderly and natural rather than in a haphazard way It suggests that we may if we learn how personality grows use the facts we have discovered about life in such a way as to help insure that it will be sound and right About the Publisher Forgotten Books publishes hundreds of
