**The Guided Reader to Teaching and Learning Music** Jonathan

Savage, 2013-06-26

*The Guided Reader to Teaching and Learning Music* draws on extracts from the published work of some of the most influential education writers to provide insight, guidance and clarity about key issues affecting Music teachers. The book brings together key extracts from classic and contemporary writing and contextualises these in both theoretical and practical terms. The extracts are accompanied by a summary of the key ideas and issues, raised questions to promote discussion and reflective practice and annotated further reading lists to extend thinking. Taking a thematic approach and including a short introduction to each theme, the chapters cover:

- Analysing your own work as a music teacher
- Concepts of musicality
- Notions of musical development and progression
- Pedagogies for teaching music musically
- Music inside and outside the school
- Formal, informal and non formal approaches to music education
- Productive methods of assessment and transition for music education
- Creativity and music education
- Supporting the gifted and talented in music
- Using ICT within music education

Aimed at trainee and newly qualified teachers, including those working towards Masters level qualifications as well as practicing teachers, this accessible but critically provocative text will be an essential resource for all teachers that wish to deepen their understanding of Music Education.

*Learning to Teach Music in the Secondary School* Chris Philpott, 2001

**What Should Schools Teach?** Alka Sehgal Cuthbert , Alex Standis, 2021-01-07 The design of school curriculums involves deep thought about the nature of knowledge and its value to learners and society It is a serious responsibility that raises a number of questions What is knowledge for What knowledge is important for children to learn How do we decide what knowledge matters in each school subject And how far should the knowledge we teach in school be related to academic disciplinary knowledge These and many other questions are taken up in What Should Schools Teach The blurring of distinctions between pedagogy and curriculum and between experience and knowledge has served up a confusing message for teachers about the part that each plays in the education of children Schools teach through subjects but there is little consensus about what constitutes a subject and what they are for This book aims to dispel confusion through a robust rationale for what schools

should teach that offers key understanding to teachers of the relationship between knowledge what to teach and their own pedagogy how to teach and how both need to be informed by values of intellectual freedom and autonomy This second edition includes new chapters on Chemistry Drama Music and Religious Education and an updated chapter on Biology A revised introduction reflects on emerging discourse around decolonizing the curriculum and on the relationship between the knowledge that children encounter at school and in their homes
