

Teaching Science to Students with Special Needs

James R. Patton

Introduction

Science permeates our everyday lives—and science education can occur every place we cast our attention or, as a credit card commercial suggests, “It’s everywhere you want to be.” Relevant topics run the gamut from flatulence to keeping soda in plastic bottles from going flat. A recent advertisement in a weekly newsmagazine illustrated how science is related to various items found in a typical adolescent’s bedroom (e.g., sneakers, boombox, posters). Science can provide

students with essential experiences that kindle new ideas, relationships, and learning (Jenkins, Stein, & Osborn, 1983).

As professionals interested in preparing students for the challenges of adulthood, we must ensure that *all* students—both with and without special needs—receive meaningful and relevant science education. If science is important in many aspects of our lives, then science education must cover the topics that have a significant impact on our personal, family, workplace, and community needs. Further, we must interest students in sci-

ence early and ensure that girls are afforded equal opportunities, treatment, and outcomes in science.

Guiding Principles

Science education in general is moving through the second wave of educational reform. In the first wave of reform, during the late 1960s and early 1970s, educators developed more process/inquiry-oriented programs. Until the current reform movement began, there had been a return to the more traditional approaches to teaching science (i.e., heavy reliance on text-
