**Evidence-Based Inquiries in Ethno-STEM Research** Iman C Chahine, Josef de Beer, 2021-01-01 The purpose of the edited volume is to provide an international lens to examine evidence based investigations in Ethno STEM research Ethno science Ethno technology Ethno engineering and Ethno mathematics These themes grew out of multi national multi institutional and multi disciplinary efforts to preserve as well as epitomize the role that Indigenous Knowledge Systems IKS play in cognitive development and its vital contributions to successful and meaningful learning in conventional and non conventional contexts Principled by the Embodied Situated and Distributed Cognition ESDC this innovative book will provide evidence supporting the embeddedness of a thinking in acting model as a fundamental framework that explains and supports students acquisition of scientific knowledge So often western science curricula are experienced as irrelevant since it does not take cognizance of the daily experiences and world in which the learner finds himself This book takes a socio cultural look at IKS and applies research in neuroscience to make a case its incorporation in the STEM Science Technology Engineering and Mathematics classroom We use the Embodied Situated Distributed Cognition ESDC Model as conceptual framework in this book Although the value of IKS is often acknowledged in curriculum policy documents teachers are most often not trained in incorporating IK in the classroom Teachers lack of the necessary pedagogical content knowledge PCK in effectively incorporating IK in their classrooms is a tremendous problem internationally Another problem is that IK is often perceived as pseudo science and scholars advocating for the incorporation of IK in the school curriculum often do not contextualize their arguments within a convincing theoretical and conceptual framework **Teaching Secondary Science** Keith Ross, Liz

Lakin, Janet McKechnie, Jim Baker, 2010-02-25 Now fully updated in its third edition *Teaching Secondary Science* is a comprehensive guide to all aspects of science teaching providing a wealth of information and ideas about different approaches. With guidance on how children understand scientific ideas and the implications this has on teaching, teachers are encouraged to construct their own meanings and become reflective in their practice. Relating science to government agendas such as the National Strategies Assessment for Learning and Every Child Matters, this new edition reflects and maps to changes in national standards. Key features include illustrative examples for use in the classroom, theoretical grounding linked to practical application, the pros and cons of different approaches, M Level support materials, additional section on earth atmosphere and space, advice on teaching difficult ideas, education for sustainable development, managing the science classroom and health and safety support for talk for learning and advice on numeracy in science. Presenting an environmentally sustainable global approach to science teaching, this book emphasises the need to build on and challenge children's existing ideas so they better understand the world in which they live. Essential reading for all students and practising teachers, this invaluable book will support those undertaking secondary science PGCEs and provides material suitable for those studying at M Level.

**Early Explorations In Science** Johnston, Jane, 2005-07-01 Reviewers' comments on the first edition: Jane Johnston communicates a sense of effervescent enthusiasm for teaching and science and her treatment is comprehensive. TES The ideas and recommendations based on considerable classroom experience make this book a valuable aid to students and reflective early years practitioners. Primary Science Review At last! A serious attempt to explore the scientific potential of infant and pre-school children. The author explains how scientific skills can be developed at an early stage, stimulating the natural inquisitive streak in children. This book will start you thinking about science in a much more positive light. Child Education This accessible and practical book supports good scientific practice in the early years. It helps practitioners to be creative providers and shows them how to develop awe and wonder of the world in the children they teach. The book highlights the importance of a motivating learning environment and skilled interaction with well-trained adults. In addition, fundamental issues are explored such as the range, nature and philosophical underpinning of early years experiences and the development of emergent scientific skills, understandings and attitudes. New features for this edition include: An extended age range encompassing early learning from 0-8. Updated material for the Foundation Stage Curriculum for 3-5 year olds and the National Curriculum 2000 for 5-8 year olds. A new chapter focusing on conceptual understanding and thinking skills in the early years. An emphasis on the importance of informal learning and play in early development. The book introduces and discusses new research and thinking in early years and science education throughout, making it relevant for current practice. This is an indispensable resource for all trainee and practising primary school teachers and early years practitioners.
