modern treatment of Hurst's original system of market cycle analysis. It will teach you how to get to the point where you can isolate cycles in any freely traded financial instrument and make an assessment of their likely future course. Although Hurst's methodology can seem outwardly complex, the logic underpinning it is straightforward. With practice, the skill needed to conduct a full cycle analysis quickly and effectively will become second nature. The rewards for becoming adept are high: conviction trades, tight risk management, and mastery of a largely non-correlated system of analysis. In this extensive step-by-step guide, you will find a full description of the principal tools and techniques taught by Hurst, as well as over 120 colour charts together with tables and diagrams. The Updata and TradeStation code for all of the indicators shown is also included.

Automation of Trading Machine for Traders Jacinta Chan, 2019-12-02. This Palgrave Pivot innovatively combines new methods and approaches to building dynamic trading systems to forecast future price direction in today's increasingly difficult and volatile financial markets. The primary purpose of this book is to provide a structured course for building robust algorithmic trading models that forecast future price direction. Chan provides insider information and insights on trading strategies; her knowledge and experience have been gained over two decades as a trader in foreign exchange, stock, and derivatives markets. She guides the reader to build, evaluate, and test the predictive ability and the profitability of abnormal returns of new hybrid forecasting models.
