The thirty artists represented here discuss the techniques they use to create unique forms and the methods they use to glaze and decorate their work. All types of forming methods from handbuilding to slipcasting are illustrated in detailed step by step photo sequences along with surface techniques that cover a wide range of decorative possibilities. Many of the techniques in this book revolve around making complete projects from forming through decoration so you get a variety of techniques from a single artist. Every new technique you learn can alter the way you currently work or even take you off on a whole different adventure. This book is indeed an atlas of possibilities. Where will you go? *The Evolution of Techniques* Mathieu Charbonneau, 2024-03-19 A novel interdisciplinary exploration of the relative contributions of rigidity and flexibility in the adoption, maintenance, and evolution of technical traditions. Techniques can either be used in rigid stereotypical ways or in flexibly adaptive ways or in some combination of the two. *The Evolution of Techniques* edited by Mathieu Charbonneau addresses the impacts of both flexibility and rigidity on how techniques are used, transformed, and reconstructed at varying social and temporal scales. The multidisciplinary contributors demonstrate the important role of the varied learning contexts and social configurations involved in the transmission, use, and evolution of techniques. They explore the diversity of cognitive, behavioral, sociocultural, and ecological mechanisms that promote and constrain technical flexibility and rigidity, proposing a deeper picture of the enablers of and obstacles to technical transmission and change. In line with the extended evolutionary synthesis, the book proposes a more inclusive and materially grounded conception of technical evolution in terms of promiscuous, dynamic, and multidirectional causal processes. Offering new evidence and novel theoretical perspectives, the contributors deploy a diversity of methods including ethnographies, field and laboratory experiments, cladistics, and phylogenetic tree building, historiography, and philosophical analysis. Examples of the wide range of topics covered include field experiments with potters from five cultures, stability and change in Paleolithic toolmaking, why children lack flexibility when making tools, and cultural techniques in nonhuman animals. The volume's three thematic sections are Timescales of technical rigidity and flexibility, Rigid copying to flexible reconstruction, and Exogenous factors of technical rigidity and flexibility. The volume closes with a discussion by philosopher Kim Sterelny. Contributors: Rita Astuti, Adam Howell, Boyette Blandine, Bril Josep, Call Mathieu, Charbonneau Arianna, Curioni Nicola, Cutting Bert, De Munck Gyrgy, Gergely Anne, Lise Goujon, Ildik Kiraly, Catherine Lara, Sbastien Manem, Luke McEllin, Helena Miton, Giulio Ongaro, Sarah Pope, Caldwell Valentine, Roux Manon, Schweinfurth Dan, Sperber Kim, Sterelny Dietrich, Stout James, W A Strachan, Sadie Tenpas.
