Techniques And Concepts Of High Energy Physics X:

Techniques and Concepts of High Energy Physics X Thomas Ferbel, 2012-12-06 The Proceedings of the tenth Advanced Study Institute ASI on Techniques and Concepts of High Energy Physics are dedicated to Jane and Bob Wilson. Jane joined Bob at St Croix for the first session of this Institute after Bob had stepped down as director of Fermilab and was scheming to build a modest charm factory in the parking lot of Columbia University's Nevis Laboratory. Through the years Bob has been a great friend of the School and much of its success and flavor can be attributed to his guidance and support. The 1998 meeting was held once again at the Hotel on the Cay and as before the work and the fun went on very enjoyably. We had a total of 76 participants from 23 countries with the main financial support for the meeting provided by the Scientific Affairs Division of the North Atlantic Treaty Organization NATO. The ASI was co-sponsored by the U.S. Department of Energy by the Fermi National Accelerator Laboratory Fermilab by the U.S. National Science Foundation and by the University of Rochester. As in the case of the previous ASIs, the scientific program was designed for advanced graduate students and recent PhD recipients in experimental particle physics. The present volume of lectures should complement and update the material published by Plenum for the first nine ASIs and prove to be of value to a wider audience of physicists.

Techniques and Concepts of High-Energy Physics IV Thomas Ferbel, 2012-12-06 The fourth Advanced Study Institute ASI on Techniques and Concepts of High Energy Physics was held once again at the Hotel on the Cay in the scenic harbor of Christiansted St Croix U.S. Virgin Islands. The ASI brought together a total of 67 participants from 17 different countries. It was a great success due to the dedication of the inspiring lecturers, the exceptional student body and of course the beautiful setting. The primary support for the meeting was again provided by the Scientific Affairs Division of NATO. The ASI was cosponsored by the U.S. Department of Energy by Fermilab by the National Science Foundation and by the University of Rochester. A special contribution from the Oliver S. and Jennie R. Donaldson Charitable Trust provided an important degree of flexibility as well as support for worthy students from developing nations. As in the case of the previous ASI's, the scientific program was designed for advanced graduate students and recent PhD recipients in experimental particle physics. The present volume of lectures should complement the material published in the first three ASI's and prove to be of value to a wider audience of physicists. It is a pleasure to acknowledge the encouragement and support that I have continued to receive from colleagues and friends in organizing this meeting. I am indebted to the members of my Advisory Committee for their infinite patience and excellent advice. I am grateful to my distinguished lecturers for participating in the ASI.
