Revisiting Institutionalism in Sociology Seth Abrutyn, 2013-11-07 There may not be a concept so central to sociology yet so vaguely defined in its contemporary usages than institution In *Revisiting Institutionalism in Sociology* Abrutyn takes an in depth look at what institutions are by returning to some of the insights of classical theorists like Max Weber and Herbert Spencer the functionalisms of Talcott Parsons and S N Eisenstadt and the more recent evolutionary institutionalisms of Gerhard Lenski and Jonathan Turner Returning to the idea that various levels of social reality shape societies Abrutyn argues that institutions are macro level structural and cultural spheres of action exchange and communication They have emergent properties and dynamics that are not reducible to other levels of social reality Rather than fall back on old functionalist solutions Abrutyn offers an original and synthetic theory of institutions like religion or economy the process by which they become autonomous or distinct cultural spaces that shape the color and texture of action exchange and communication embedded within them and how they gain or lose autonomy by theorizing about institutional entrepreneurship Finally Abrutyn lays bare the inner workings of institutions including their ecology the way structure and culture shape lower levels of social reality and how they develop unique patterns of stratification and inequality founded on their ecology structure and culture Ultimately Abrutyn offers a refreshing take on macrosociology that brings functionalist conflict and cultural sociologies together while painting a new picture of how the seemingly invisible macro world influences the choices humans make and the goals we set

Crime, Violence and Modernity Gordon Hughes, 2022-04-26 This book makes an original contribution to reconnecting criminological inquiry to the core concerns of the classical sociological imagination and to the intellectual resources of comparative and historical sociology Throughout the book Hughes challenges the long standing division of labour in criminology and sociology more

generally between theory method and research Accordingly the author s concerns here are as much about the craft and working methods of being a sociological criminologist as it is about theory and concepts In the first half of the book the key conceptual and methodological premises of the classical sociological tradition are outlined and the latter s potential for revitalizing contemporary criminological research theorizing are assessed These chapters also address the debate regarding the relationship between crime and violence and that of modernity and the Western civilizing process In the second half of the book three areas of current criminological inquiry are explored through the lens of the long term process oriented and radically relational perspective of contemporary Weberian and Eliasian scholarship Among the areas of comparative investigation explored here are street crime gangs and urban violence genocide and murderous ethnic cleansing warfare colonialism and human rights Written in a clear and direct style this book will appeal to students and scholars of criminology sociology and all those interested in what a sociological lens brings to the practices of contemporary criminology

The Handbook of Communication in Cross-cultural Perspective Donal Carbaugh, 2016-08-19 This handbook brings together 26 ethnographic research reports

from around the world about communication. The studies explore 13 languages from 17 countries across 6 continents. Together the studies examine through cultural analyses communication practices in cross cultural perspective. In doing so and as a global community of scholars the studies explore the diversity in ways communication is understood around the world, examine specific cultural traditions in the study of communication and thus inform readers about the range of ways communication is understood around the world. Some of the communication practices explored include complaining, hate speech, irreverence, respect and uses of the mobile phone. The focus of the handbook however is dual in that it brings into view both communication as an academic discipline and its use to unveil culturally situated practices. By attending to communication in these ways as a discipline and a specific practice the handbook is focused on and will be an authoritative resource for understanding communication in cross cultural perspective. Designed at the nexus of various intellectual traditions such as the ethnography of communication, linguistic ethnography and cultural approaches to discourse the handbook employs then a general approach which when used understands communication in its particular cultural scenes and communities.

Revisiting Crimes of the Powerful Steven Bittle, Laureen Snider, Steve Tombs, David Whyte, 2018-06-13

Frank Pearce was the first scholar to use the term crimes of the powerful. His ground breaking book of the same name provided insightful critiques of liberal orthodox criminology particularly in relation to labelling theory and symbolic interactionism while making important contributions to Marxist understandings of the complex relations between crime, law and the state in the reproduction of the capitalist social order. Historically crimes of the powerful were largely neglected in crime and deviance studies but there is now an important and growing body of work addressing this gap. This book brings together leading international scholars to discuss the legacy of Frank Pearce's book and his work in this area, demonstrating the invaluable contributions a critical Marxist framework brings to studies of corporate and state crimes nationally, internationally and on a global scale. This book is neither a hagiography nor a review of random areas of social scientific interest. Instead it draws together a collection of scholarly and original articles which draw upon and critically interrogate the continued significance of the approach pioneered in *Crimes of the Powerful*. The book traces the evolution of crimes of the powerful empirically and theoretically since 1976, shows how critical scholars have integrated new theoretical insights derived from post structuralism, feminism and critical race studies and offers perspectives on how the crimes of the powerful and the enormous ongoing destruction they cause can be addressed and resisted.

Revisiting the Self Charalambos Tsekeris, 2017-10-02

Who am I? Or even more curiously, who are you? These are questions about the self, that aspect of who we are that we believe defines or at least describes each of us. The self is not merely an internal creation; however, family, friends, colleagues and acquaintances all contribute to who we are and more importantly they help to shape who we think we are. In this innovative and thought provoking book the various social aspects of the self and its construction are imaginatively explored. Such explorations can seem abstractly academic but they carry great significance. Knowledge of how the self is

constructed has many implications for most social processes for example understanding the volatility of the notion of self that can provide the basis for terrorist radicalisation can generate destructive suicidal tendencies or can foment aggressive national identities This interdisciplinary collection is relevant not only for theoretical and methodological elaborations but also for more practical considerations The chapters in this book were originally published as a special issue of Contemporary Social Science and two articles from Self and Identity
