Soft Methods In Probability Statistics And Data Analysis:

Soft Methods in Probability, Statistics and Data Analysis Przemyslaw Grzegorzewski, Olgierd Hryniewicz, Maria A. Gil, 2013-12-11 Classical probability theory and mathematical statistics appear sometimes too rigid for real life problems especially while dealing with vague data or imprecise requirements These problems have motivated many researchers to soften the classical theory Some softening approaches utilize concepts and techniques developed in theories such as fuzzy sets theory rough sets possibility theory theory of belief functions and imprecise probabilities etc Since interesting mathematical models and methods have been proposed in the frameworks of various theories this text brings together experts representing different approaches used in soft probability statistics and data analysis *Combining Soft Computing and Statistical Methods in Data Analysis* Christian Borgelt, Gil Gonz Rodr Guez, Wolfgang Trutschnig, 2011-03-13 **Soft Methods for Integrated Uncertainty Modelling** Jonathan Lawry, Enrique Miranda, Alberto Bugarin, Shoumei Li, Maria Angeles Gil, Przemyslaw Grzegorzewski, Olgierd Hryniewicz, 2007-10-08 The idea of soft computing emerged in the early 1990s from the fuzzy systems community and refers to an understanding that the uncertainty imprecision and ignorance present in a problem should be explicitly represented and possibly even exploited rather than either eliminated or ignored in computations For instance Zadeh defined Soft Computing as follows Soft computing differs from conventional hard computing in that unlike hard computing it is tolerant of imprecision uncertainty and partial truth In effect the role model for soft computing is the human mind Recently soft computing has to some extent become synonymous with a hybrid approach combining AI techniques including fuzzy systems neural networks and biologically inspired methods such as genetic algorithms Here however we adopt a more straightforward definition consistent with the original concept Hence soft methods are understood as those uncertainty formalisms not part of mainstream statistics and probability theory which have typically been developed within the AI and decision analysis community These are mathematically sound uncertainty modelling methodologies which are complementary to conventional statistics and probability theory *Soft Methods for Handling Variability and Imprecision* Didier Dubois, Maria Asuncion Lubiano, Henri Prade, Maria Angeles Gil, Przemyslaw Grzegorzewski, Olgierd Hryniewicz, 2008-10-01 Probability theory has been the only well founded theory of uncertainty for a long time It was viewed either as a powerful tool for modelling random phenomena or as a rational approach to the notion of degree of belief During the last thirty years in areas centered around decision theory artificial intelligence and information processing numerous approaches extending or orthogonal to the existing theory of probability and mathematical statistics have come to the front The common feature of those attempts is to allow for softer or wider frameworks for taking into account the incompleteness or imprecision of information Many of these approaches come down to blending interval or fuzzy interval analysis with probabilistic methods This book gathers contributions to the 4th International Conference on Soft methods in Probability and Statistics Its aim is to present recent results illustrating such new trends that enlarge the

statistical and uncertainty modeling traditions towards the handling of incomplete or subjective information It covers a broad scope ranging from philosophical and mathematical underpinnings of new uncertainty theories with a stress on their impact in the area of statistics and data analysis to numerical methods and applications to environmental risk analysis and mechanical engineering A unique feature of this collection is to establish a dialogue between fuzzy random variables and imprecise probability theories

Intelligent Information Processing and Web Mining Mieczysław A. Kłopotek, Sławomir T. Wierzchoniak, Krzysztof Trojanowski, 2006-05-28 The international conference Intelligent Information Processing and Web Mining IIS IIPWM 05 organized in Gdańsk Sobieszewo on 13-16th June 2005 was a continuation of a long tradition of conferences on applications of Artificial Intelligence AI in Information Systems IS organized by the Institute of Computer Science of Polish Academy of Sciences in cooperation with other scientific and business institutions The Institute itself is deeply engaged in research both in AI and IS and many scientists view it as a leading institution both in fundamental and applied research in these areas in Poland The originators of this conference series Prof M Dąbrowski and Dr M Michalewicz had in 1992 a long term goal of bringing together scientists and industry of different branches from Poland and abroad to achieve a creative synthesis One can

say that their dream has come to reality Scientists from ve continents made their subm sions to this conference A brief look at the a liations makes international cooperation visible The research papers have either a motivation in c crete applications or are o springs of some practical requests This volume presents the best papers carefully chosen from a large set of submissions about 45% At this point we would like to express our thanks to the m bers of Programme Committee for their excellent job Also we are thankful to the organizers of the special sessions accompanying this conference Jan Komorowski Adam Przepi rkowski Zbigniew W Symbolic and Quantitative Approaches to Reasoning with Uncertainty Lluís Godo,2005-06-24 These are the proceedings of the 8th European Conference on Symbolic and Quantitative Approaches to Reasoning with Uncertainty ECSQARU 2005 held in Barcelona Spain July 6 8 2005 The ECSQARU conferences are biennial and have become a major forum for advances in the theory and practice of r soning under uncertainty The rst ECSQARU conference was held in Marseille 1991 and after in Granada 1993 Fribourg 1995 Bonn 1997 London 1999 Toulouse 2001 and Aalborg 2003 The papers gathered in this volume were selected out of 130 submissions after a strict review process by the members of the Program Committee to be presented at ECSQARU 2005 In addition the conference included invited lectures by three outstanding researchers in the area Seraf n Moral Imprecise Probabilities Rudolf Kruse Graphical Models in Planning and J er ome Lang Social Choice Moreover the application of uncertainty models to real world problems was addressed at ECSQARU 2005 by a special session devoted to s cessful industrial applications organized by Rudolf Kruse Both invited lectures and papers of the special session contribute to this volume On the whole the programme of the conference provided a broad rich and up to date perspective of the current high level research in the area which is re ected in the contents of this volume IwouldliketowarmlythankthemembersoftheProgramCommitteeandthe additional referees for their valuable work the invited speakers and the invited session organizer **Computational Intelligence in Reliability Engineering** Gregory Levitin,2007-01-10 This two volume book covers the recent applications of computational intelli gence techniques in reliability engineering Research in the area of computational intelligence is growing rapidly due to the many successful applications of these new techniques in very diverse problems Computational Intelligence covers many fields such as neural networks fu zzy logic evolutionary computing and their hybrids and derivatives Many indus tries have benefited from adopting this technology The increased number of patents and diverse range of products devel oped using computational intelligence methods is evidence of this fact These techniques have attracted increasing attention in recent years for solving many complex problems They are inspired by nature biology statistical tech niques physics and neuroscience They have been successfully applied in solving many complex problems where traditional problem solving methods have failed The book aims to be a repository for the current and cutting edge applications of computational intelligent techniques in reliability analysis and optimization **Coping with Uncertainty** Kurt Marti,Yuri Ermoliev,Marek Makowski,2009-12-24 Support for addressing the on going global changes needs solutions for new scientific problems which

in turn require new concepts and tools A key issue concerns a vast variety of irreducible uncertainties including extreme events of high multidimensional consequences e g the climate change The dilemma is concerned with enormous costs versus massive uncertainties of extreme impacts Traditional scientific approaches rely on real observations and experiments Yet no sufficient observations exist for new problems and pure experiments and learning by doing may be expensive dangerous or impossible In addition the available historical observations are often contaminated by past actions and policies Thus tools are presented for the explicit treatment of uncertainties using synthetic information composed of available hard data from historical observations the results of possible experiments and scientific facts as well as soft data from experts opinions and scenarios

Modelling and Reasoning with Vague Concepts Jonathan Lawry,2006-06-17 This volume introduces a formal representation framework for modelling and reasoning that allows us to quantify the uncertainty inherent in the use of vague descriptions to convey information between intelligent agents This can then be applied across a range of applications areas in automated reasoning and learning The utility of the framework is demonstrated by applying it to problems in data analysis where the aim is to infer effective and informative models expressed as logical rules and relations involving vague concept descriptions The author also introduces a number of learning algorithms within the framework that can be used for both classification and prediction regression problems It is shown how models of this kind can be fused with qualitative background knowledge such as that provided by domain experts The proposed algorithms will be compared with existing learning methods on a range of benchmark databases such as those from the UCI repository

Uncertainty and Imprecision in Decision Making and Decision Support: Cross-Fertilization, New Models and Applications Krassimir T. Atanassov,Janusz Kacprzyk,Andrzej Kałuszko,Maciej Krawczak,Jan Owsinski,Sotir Sotirov,Evdokia Sotirova,Eulalia Szmidt,Sławomir Zadrozny,2017-10-06 This book presents selected papers from two important conferences held on October 12 14 2016 in Warsaw Poland the Fourteenth National Conference of Operational and Systems Research BOS 2016 one of the premiere conferences in the field of operational and systems research not only in Poland but also at the European level and the Fifteenth International Workshop on Intuitionistic Fuzzy Sets and General Nets IWIFSGN 2016 one of the foremost conferences on fuzzy logic notably addressing extensions of the traditional fuzzy sets as well as the Generalized Nets GNs a powerful extension of the traditional

Petri net paradigm The scope of the BOS conferences includes all types of problems related to systems modeling systems analysis broadly perceived operational research optimization decision making and decision support to name but a few In all these areas virtually all models used have to take into account not only uncertainty in its traditional sense but also imprecision of information That is in addition to traditional probabilistic and statistical tools and techniques the use of methods based on fuzzy sets can also be sensible Even more so employing certain extensions of the classic concept of a fuzzy set can be very useful Applying intuitionistic fuzzy sets which are at the core of the IWIFSGN conferences is a good example Both conferences BOS 2016 and IWIFSGN 2016 offered ideal venues for the exchange of ideas cross fertilization and mutual inspiration

Issues and Challenges of Intelligent Systems and Computational Intelligence László T. Kóczy, Claudiu R. Pozna, Janusz Kacprzyk, 2014-01-11 This carefully edited book contains contributions of prominent and active researchers and scholars in the broadly perceived area of intelligent systems The book is unique both with respect to the width of coverage of tools and techniques and to the variety of problems that could be solved by the tools and techniques presented The editors have been able to gather a very good collection of relevant and original papers by prominent representatives of many areas relevant both to the theory and practice of intelligent systems artificial intelligence computational intelligence soft computing and the like The contributions have been divided into 7 parts presenting first more fundamental and theoretical contributions and then applications in relevant areas
