Handbook of Re-Engineering Software Intensive Systems into Software Product Lines Roberto E. Lopez-Herrejon, Jabier Martinez, Wesley Klewerton Guez Assunção, Tewfik Ziadi, Mathieu Acher, Silvia Vergilio, 2022-11-22 This handbook distills the wealth of expertise and knowledge from a large community of researchers and industrial practitioners in Software Product Lines SPLs gained through extensive and rigorous theoretical empirical and applied research It is a timely compilation of well established and cutting edge approaches that can be leveraged by those facing the prevailing and daunting challenge of re engineering their systems into SPLs The selection of chapters provides readers with a wide and diverse perspective that reflects the complementary and varied expertise of the chapter authors This perspective covers the re engineering processes from planning to execution SPLs are families of systems that share common assets allowing a disciplined software reuse The adoption of SPL practices has shown to enable significant technical and economic benefits for the companies that employ them However successful SPLs rarely start from scratch but instead they usually start from a set of existing systems that must undergo well defined re engineering processes to unleash new levels of productivity and competitiveness Practitioners will benefit from the lessons learned by the community captured in the array of methodological and technological alternatives presented in the chapters of the handbook and will gain the confidence for undertaking their own re engineering challenges Researchers and educators will find a valuable single entry point to quickly become familiar with the state of the art on the topic and the open research opportunities including undergraduate graduate students and R D engineers who want to have a comprehensive understanding of techniques in reverse engineering and re engineering of variability rich software systems

Software Product-Family Engineering Frank van der Linden, 2003-07-31 This book contains the proceedings of the Fourth International Workshop on Product Family Engineering PFE 4 held in Bilbao Spain October 3-5 2001 This workshop was the fourth in a series started in 1996 with the same subject software product family engineering Proceedings of the second and third workshops have been published as LNCS 1429 and LNCS 1951 The workshops were organized within co operation projects of European industry the first two by ARES Esprit IV 20 477 1995 1999 This project had three industrial and three academic partners and focused on software architectures for product families Some of the partners continued in ITEA project 99005 ESAPS 1999 2001 ITEA is the software development program 2023 within the European Eureka initiative ITEA projects last for two years and ESAPS was succeeded by CAFE ITEA ip00004 which started in 2001 and will terminate in 2003 This workshop was initially prepared within ESAPS and the preparation continued in CAFE Due to the attacks in the USA of September 11 several people were not able to attend and therefore did not show up However we have included their submissions in these proceedings The session chair presented these submissions and their inputs were used during the discussions It was planned that Henk Obbink be workshop chair and Linda Northrop and Sergio Bandinelli

be co chairs However because of personal circumstances Henk Obbink was not able to leave home during the workshop Moreover both co chairs had already enough other duties Therefore the chairing duties were taken over by the program chair Frank van der Linden *Consumer Information Systems and Relationship Management: Design, Implementation, and Use* Lin, Angela,Foster, Jonathan,Scifleet, Paul,2013-05-31 Businesses continue to design and implement a variety of information systems that facilitate the creation aggregation and provision of product related information in order to increase the role that quality information is playing in consumers decision making processes Consumer Information Systems and Relationship Management Design Implementation and Use highlights empirical research theoretical frameworks and relevant models on the understanding and implementation of consumer information systems By covering consumer perceptions of practicality and ease of use this book is essential for practitioners in business environments and strategic management meeting consumer needs through the use of digital and Web based technologies as well as recent empirical research findings and design and implementation of innovative information systems This book is part of the Advances in Marketing Customer Relationship Management and E Services series collection The British National Bibliography Arthur James Wells,2002
