Software Prototyping In Data And Knowledge Engineering:

Software Prototyping in Data and Knowledge Engineering G. Guida, G. Lamperti, Marina Zanella, 2013-03-07 This monograph describes an innovative prototyping framework for data and knowledge intensive systems The proposed approach will prove especially useful for advanced and research oriented projects that aim to develop a traditional database perspective into fully fledged advanced database approaches and knowledge engineering technologies The book is organised in two parts The first part comprising chapters 1 to 4 provides an introduction to the concept of prototyping to database and knowledge based technologies and to the main issues involved in the integration of data and knowledge engineering The second part comprising chapters 5 to 12 illustrates the proposed approach in technical detail Audience This volume will be of interest to researchers in the field of databases and knowledge engineering in general and for software designers and knowledge engineers who aim to expand their expertise in data and knowledge intensive systems **Big Data Analytics**

and Knowledge Discovery Carlos Ordonez, Ladjel Bellatreche, 2018-08-20 This book constitutes the refereed proceedings of the 20th International Conference on Big Data Analytics and Knowledge Discovery DaWaK 2018 held in Regensburg Germany in September 2018 The 13 revised full papers and 17 short papers presented were carefully reviewed and selected from 76 submissions The papers are organized in the following topical sections Graph analytics case studies classification and clustering pre processing sequences cloud and database systems and data mining *Advanced Topics in Artificial Intelligence* Rolf T. INFORMATION SYSTEMS IN THE KNOWLEDGE ECONOMY JOSEPH, P.T., S.J., MOHAPATRA, SANJAY, 2014-01-01 The textbook now in its Second Edition includes a new chapter on ERP as a Business Enabler The text continues to provide a comprehensive coverage of business applications of management information systems in today's new era of knowledge based economy where the value of a firm's knowledge assets has become a key source that can be leveraged into long term benefits The text focuses on the information systems requirements vis vis management perspectives required in business environment The technology innovations are covered with particular emphasis on Data Management Systems Decision Support and Expert Systems On the other hand several business applications such as e commerce and mobile applications made possible only because of continuing innovations in the field of information and communications technology ICT are thoroughly treated in the text Besides the book covers crucial issues of information security and legal and ethical issues which are important both from the point of view of technology and business The book uses case discussions in each chapter to help students understand MIS practices in organizations The cases also enable students to grasp how a systemic approach to every functional aspect of management can lead to formulating technology based strategies in line with corporate goals Primarily intended for undergraduate and postgraduate students of management BBA MBA the knowledge and information provided in this book will also be of immense value to business managers and practitioners for improving decision making processes and

achieving competitive advantage **Approaches to Prototyping** R. Budde, K. Kuhlenkamp, L. Mathiassen, H. Züllighoven, 2012-12-06 This conference will focus on the user oriented development of information systems Against a background of recent concepts for the implementation of distributed systems based on workstation computers various communicational organizational and social issues gain increasing importance in the construction of computer based information systems There is an urgent need to integrate end users and other affected groups into the development process New strategies for system development are thus needed This was the beginning of the Call for Papers to the Working Conference on Prototyping Working in the fields of user oriented software construction and the analysis of communication problems between developers and users we that is the GMD team involved in this conference and in preparing its Proceedings sooner or later came across various new concepts to overcome the problems sketched above Concepts focusing on the quick construction of an operative system such as rapid prototyping or concepts aiming at the human and organizational side of the development process such as Systemeering Even on a second look the multitude of different approaches terms and tools still caused confusion But despite the differences every concept seemed to have something to do with Prototyping This however proved to be of little help to us because the term Prototyping itself turned out to be quite fuzzy In this obviously confused situation we decided that it was time for a working conference Data and Knowledge Bases Catriel Beeri, Umesh Dayal, J.W. Schmidt, 1988-10 Proceedings of the meeting held in Jerusalem Israel June 1988 Thirty papers represent a cross section of the many facets of contemporary database research and provide an up to date account of activities of some of the leading companies in the database field Covers knowledge based application *Intelligent Software for Chemical Analysis* L.M.C. Buydens, P.J. Schoenmakers, 1993-09-03 Various emerging techniques for automating intelligent functions in the laboratory are described in this book Explanations on how systems work are given and possible application areas are suggested The main part of the book is devoted to providing data which will enable the reader to develop and test his own systems The emphasis is on expert systems however promising developments such as self adaptive systems neural networks and genetic algorithms are also described The book has been written by chemists with a great deal of practical experience in developing and testing intelligent software and therefore offers first hand knowledge Laboratory staff and managers confronted with commercial intelligent software will find information on the functioning possibilities and limitations thereof enabling them to select and use modern software in an optimum fashion Finally computer scientists and information scientists will find a wealth of data on the application of contemporary artificial intelligence techniques
