Solidarity With Victims Toward A Theology Of Social Transformation:

Lonergan, Social Transformation, and Sustainable Human Development Joseph Ogbonnaya, 2013-01-29 Secular contemporary development discourse deals with the problems of societal development and transformation by prioritizing the human good in terms of vital and social values with the aim of providing the basic necessities of life through social institutions that work. While such an approach is profitable by promoting economic growth, it does not take note of other dynamics of social progress and development. Also, it fails to notice the consequences of development strategies on human flourishing, well-being, and happiness. Ogbonnaya argues for an integral approach to development by engaging in a fruitful dialogue between Bernard Lonergan's philosophical anthropology with contemporary development discourse as represented in select theories of development and in select principles of Catholic social teaching. It makes a case for social progress and transformation as emanating from human understanding. Also, it highlights the parts of Lonergan's theory that contribute to an understanding specifically of his treatment of bias and of the shorter and longer cycles of societal decline. In view of the reality of moral impotence and limitations, it considers the reversal of societal decline as possible through the supernatural solution of God's grace.

Towards a Politics of Compassion Emeka Christian Obiezu, 2008. Wise beyond his years, Johnny Black Hawk takes pride in his mixed heritage, believing in the inherent good of both the Indians and whites. Then the Civil War brings unbearable grief and suffering. Amid troubles, triumphs, deception, and daring, Johnny struggles to follow his father's teachings about honor. Emotions long dormant are revealed as he discovers decency in a person long considered evil and the miraculous faith of another once thought a fool. Then the white man's broken promises and greed bring death and destruction to the Indian people, and he must learn to listen with his heart to an ancient sacred voice. But will he ever understand the meaning of his gift from the Grandfathers?

From Strength to Strength Robert London Smith, 2007. Drawing on his experience as a member of the clergy and the questions and concerns that arose in the course of ministering to congregants, Robert London Smith Jr. explores exactly what function the black church performs and, importantly, why. In this provocative work, he argues that much black church praxis is less authentic, relevant, and constructive today because it continues to be implicated by certain values and meanings that are themselves rooted in a historical black thematic universe that is fading and being replaced by a new set of values and meanings located within a contemporary black thematic universe. Using a practical theology method, Smith develops a theological framework context praxis to create an approach to understanding and creating an informed praxis for the black church. He then sets forth a bold project that calls for the critical engagement of black church praxis and what he calls the black thematic universe in its historical and contemporary manifestations. The goal is to transform this praxis so that it remains authentic to the Gospel and the religious traditions and history of those who come to interpret and live out its message in the world while being relevant to the issues and challenges of the present historical context in which the black church lives out its meaning and purpose and constructive for the

building up and equipping of the Body of Christ Smith's creation of a black existential and theological hermeneutic is an approach that moves toward the realization of this ambitious goal This book challenges many traditional views of black church praxis including pastoral care worship and fellowship and creates a space for a renewed and much needed dialogue about the acts of the black church within contemporary America As such it is an important text for students of practical theology and African American religion as well as those interested in developing a critical understanding of the implications of the intersection of faith and culture

Back to the Rough Grounds of Praxis Daniel Franklin Pilario, 2005 What is praxis How do we do theology from its perspective These are the main questions which this book seeks to answer As propaedeutic to theological reflection it surveys the notion of praxis in the philosophical sociological and anthropological traditions from Aristotle and Marx to contemporary theories It argues that Pierre Bourdieu's theory of practice achieves a critical synthesis of these different traditions making it a viable theological dialogue partner Bourdieu provides us with a praxeological theory to scrutinize the complexity of the social realm and an epistemological theory to understand the mystery of God's presence in these socio historical conjunctures which serve as the privileged and only locus of His/Her revelation The author thus engages two theologians who take praxis/practice as central to their theological methods Clodovis Boff liberation theology and John Milbank radical orthodoxy From the perspective of its appropriated framework this work attempts to avoid the limitations as well as preserves the gains achieved by these two approaches as it also explores the rudiments of a theological method relevant to our post Marxist and postmodern global contexts

Mending the World? Niclas Blader, Kristina Helgesson Kjellin, 2017-06-16 Religion has played a major role in history affecting the course of events and influencing individuals Today one frequently hears the expression the return of religion but opinions differ as to how this return is to be understood It is clear that modernity and postmodernity have not meant that religion is dead or relegated to society's backyards Religion is still of vital importance for many people It has to some extent changed shape but has not lost its legitimacy and attractiveness to broad groups Religion is public visible and has a sought for voice but it is also wrestling with extremism ignorance and preconceptions Just like ideologies religions are capable of activating diametrically opposite traits in humans It is this dual tension that is implicit in the question mark in this book's title *Mending the World* This book's aim is to help explore whether how and in what ways religion church and theology can contribute constructively to the future of a global society In thirty one chapters researchers from around the world address the relation between religion and society

A Theology for the Earth Anne Marie Dalton, 1999-04-23 While many feel that something must be done few perceive the state of the ecological crisis as a profound religious problem While Thomas Berry sought to fire the imagination and motivate his listener to action Bernard Lonergan was absorbed by the growing gulf between traditional Christian theology and its relevance to modern problems This book brings together the work of these dynamic thinkers and examines their mutual contribution to theology for our time and for our planet Published in English
