The Ethics of Abortion Christopher Kaczor, 2014-12-05 Appealing to reason rather than religious belief this book is the most comprehensive case against the choice of abortion yet published This Second Edition of *The Ethics of Abortion* critically evaluates all the major grounds for denying fetal personhood including the views of those who defend not only abortion but also post birth abortion It also provides several non theological justifications for the conclusion that all human beings including those in utero should be respected as persons This book also critiques the view that abortion is not wrong even if the human fetus is a person *The Ethics of Abortion* examines hard cases for those who are prolife such as abortion in cases of rape or in order to save the mother's life as well as hard cases for defenders of abortion such as sex selection abortion and the rationale for being personally opposed but publically supportive of abortion It concludes with a discussion of whether artificial wombs might end the abortion debate Answering the arguments of defenders of abortion this book provides reasoned justification for the view

that all intentional abortions are ethically wrong and that doctors and nurses who object to abortion should not be forced to act against their consciences Updates and Revisions to the Second Edition include A response to Alberto Giubilini s and Francesca Minerva s now famous 2012 article After Birth Abortion in the Journal of Medical Ethics Responses to new defenses of Judith Jarvis Thomson s violinist argument The addition of a new chapter on gradualist views of fetal moral worth including Jeff McMahan s Time Relative Interest Account The addition of a new chapter on the conscience protection for health care workers who are opposed to abortion Responses to many critiques of the first edition including those made by Donald Marquis David DeGrazia and William E May *Abortion, Motherhood, and Mental Health* Ellie Lee, Whatever reproductive choices women make whether they opt to end a pregnancy through abortion or continue to term and give birth they are considered to be at risk of suffering serious mental health problems According to opponents of abortion in the United States potential injury to women is a major reason why people should consider abortion a problem On the other hand becoming a mother can also be considered a big risk This fine well balanced book is about how people represent the results of reproductive choices It examines how and why pregnancy and its various outcomes have come to be discussed this way The author s interest in the medicalization of reproduction its representation as a mental health problem first arose in relation to abortion There is a very clear contrast between the construction of women who have abortions implied by moralized argument against abortion and the construction that results when the case against abortion focuses on its effects on women s mental health Lee argues that claims that connect abortion with mental illness have been limited in their influence but this is not to suggest that they have not become a focus for discussion and have had no impact The limits to such claims about abortion do not by any means suggest limits to the process of the medicalization of pregnancy more broadly that is a process of demedicalization The final theme of Ellie Lee s book is the selective medicalization of reproduction Centering on the claim that abortion can create a post abortion syndrome the author examines the medicalization of the abortion problem on both sides of the Atlantic Lee points to contrasts in legal and medical dimensions of the abortion issue that make for some important differences but argues that in both the United States and Great Britain the post abortion syndrome claim constitutes an example of the limits to medicalization and the return to the theme of motherhood as a psychological ordeal Lee makes the case for looking to the social dimensions of mental health problems to account for and understand debates about what makes women ill Ellie Lee is research fellow in the Department of Sociology and Social Policy University of Southampton Highfield United Kingdom **Shepherding Women in Pain** Bev Hislop, 2020-04-07 A critical resource for anyone who wants to help women with the pressures frustrations and trauma they face Women today often have sources of tremendous pain in their lives such as infertility divorce domestic violence eating disorders and more Yet most leaders are not prepared to help women who have real pain from such traumatizing issues If you want to be better equipped to help women in pain this book was written for you Designed to give leaders and care givers
