The Purposeful Graduate Tim Clydesdale, 2015-05-06 We all know that higher education has changed dramatically over the past two decades Historically a time of exploration and self discovery the college years have been narrowed toward an increasingly singular goal career training and college students these days forgo the big questions about who they are and how they can change the world and instead focus single mindedly on their economic survival In The Purposeful Graduate Tim Clydesdale elucidates just what a tremendous loss this is for our youth our universities and our future as a society At the

same time he shows that it doesn't have to be this way higher education can retain its higher cultural role and students with a true sense of purpose of personal cultural and intellectual value that cannot be measured by a wage can be streaming out of every one of its institutions The key he argues is simple direct systematic and creative programs that engage undergraduates on the question of purpose Backing up his argument with rich data from a Lilly Endowment grant that funded such programs on eighty eight different campuses he shows that thoughtful engagement of the notion of vocational calling by students faculty and staff can bring rich rewards for all those involved greater intellectual development more robust community involvement and a more proactive approach to lifelong goals Nearly every institution he examines from internationally acclaimed research universities to small liberal arts colleges is a success story each designing and implementing its own program that provides students with deep resources that help them to launch flourishing lives Flying in the face of the pessimistic forecast of higher education's emaciated future Clydesdale offers a profoundly rich alternative one that can be achieved if we simply muster the courage to talk with students about who they are and what they are meant to do

*Grounded-Encounter Therapy* L. Alex Swan, 2013-10 Grounded Encounter Therapy is a discovery intervention and application approach which allows the theory which guides the process to be developed from an analysis of the situation or context rather than imposed at the outset by the therapist It is a dramatic contrast to psychological theories particularly psychoanalysis which impose a specific causal theory at the outset In GET on the other hand the theory emerges from the client defined context not the other way around The book introduces students and professionals an alternative to doing counseling and therapy Traditional therapist see what they look for and what they look for they see and what they see is what their therapeutic modalities allow them to see and what their therapeutic modalities allow them to see is what they treat
