Sophisms On Meaning And Truth:

Sophisms on Meaning and Truth Jean Buridan,1966 Sophisms on Meaning and Truth Jean Buridan,1966 God and Reason in the Middle Ages Edward Grant,2001-07-30 Between 1100 and 1600 the emphasis on reason in the learning and intellectual life of Western Europe became more pervasive and widespread than ever before in the history of human civilization Of crucial significance was the invention of the university around 1200 within which reason was institutionalized and where it became a deeply embedded permanent feature of Western thought and culture It is therefore appropriate to speak of an Age of Reason in the Middle Ages and to view it as a forerunner and herald of the Age of Reason that was to come in the seventeenth century The object of this study is twofold to describe how reason was manifested in the curriculum of medieval universities especially in the subjects of logic natural philosophy and theology and to explain how the Middle Ages acquired an undeserved reputation as an age of superstition barbarism and unreason **Sophisms on meaning and truth, tr** Jean Buridan, Sophisms on Meaning and Truth Buridanus Johannes,1966 **Handbook of Epistemology** I. Niiniluoto,Matti Sintonen,Jan Wolenski,2004-03-31 Epistemology or theory of knowledge has always been one of the most important if not the most important field of philosophy New arguments are constantly brought to bear on old views new variants are marshalled to revive ancient stands new concepts and distinctions increase the sophistication of epistemological theories There are a great many excellent textbooks monographs as well as anthologies consisting of articles in epistemology Similarly there are useful philosophical dictionaries which contain a great number of relatively short entries and general philosophical handbooks which also touch epistemological issues This volume of 27 essays grew out from the interest to see a handbook which is devoted entirely to the historical roots and systematic development of theory of knowledge It is not intended to compete but to supplement the already existing literature It aims at giving both beginners and more advanced students as well as professionals in epistemology and other areas of philosophy an overview of the central problems and solutions of epistemology The essays are self contained and still often rather extensive discussions of the chosen aspects of knowledge The contributions presuppose very little familiarity with previous literature and only a few of them require the mastery of even elementary logical notation This we hope makes the volume also accessible to the philosophically interested wider audience The contributors were asked to provide substantial up to date self contained and balanced surveys of the various subareas and more specific topics of epistemology with reference to literature *Contemporary Research in Philosophical Logic and Linguistic Semantics* D.J. Hockney,W.L. Harper,B. Freed,2012-12-06 In 1973 a workshop was held at The University of Western Ontario on topics of common interest to philosophers and linguists This volume contains most of the papers presented at the workshop Also included are previously unpublished essays by R Dougherty and H Lasnik as well as a comment on G Lakoff's paper by B van Fraassen K Donnellan's paper was presented at the workshop and subsequently appeared in The Philosophical Review We thank the editors of this journal for permission to publish the paper here The

papers by D Lewis R Stalnaker G Lakoff B Partee and H Herzberger appeared earlier in Journal of Philosophical Logic by arrangement of the editors with B van Fraassen and D Reidel Publishing Company The editors thank the officers of The University of Western Ontario for making the workshop possible and Pauline Campbell for making the workshop work THE EDITORS DAVID LEWIS COUNTERFACTUALS AND COMPARATIVE POSSIBILITY In the last dozen years or so our understanding of modality has been much improved by means of possible world semantics the project of analyzing modal language by systematically specifying the conditions under which a modal sentence is true at a possible world I hope to do the same for counterfactual conditionals I write $A \rightarrow C$ for the counterfactual conditional with antecedent A and consequent C It may be read as H it were the case that A then it would be the case that C or some more idiomatic paraphrase thereof

The Logical Renaissance Katrin Ettenhuber, 2024-01-04 This book charts for the first time the deep relationship between Renaissance literature and logic Ettenhuber shows how the study of logic creatively inspired writers in the art of argument and reasoning and offered frameworks for the discovery of literary material and advice on how to synthesise and present it

The Philosophy of Language A. Borgmann, 2012-12-06 This book deals with the philosophy of language and with what is at issue in the philosophy of language Due to its intensity and diversity the philosophy of language has attained the position of first philosophy in this century To show this is the task of Part Two But the task can be accomplished only if it is first made clear how language came to be a problem in and for philosophy and how this development has influenced and has failed to influence our understanding of language This is done in Part One What is at issue in the philosophy of language today is the question regarding the source of meaning More precisely the question is whether we have access to such a source Again Part One presents the necessary foil for Part Two in showing how meaning was thought to originate in Western history and how the rise of the philosophy of language and the eclipse of the origin of meaning occurred jointly Today the question of meaning has come to a peculiarly elaborate and fruitful issue in the philosophy of language and the fate of the philosophy of language is bound up with the future possibilities of meaning **Medieval Supposition Theory Revisited**

, 2013-10-10 In 1962-1967 Professor L M de Rijk published his *Logica Modernorum* A Contribution to the History of Early Terminist Logic The first part 1962 has the title *On the Twelfth Century Theories of Fallacy* The second part two volumes 1967 has as title *The Origin and the Early Development of the Theory of Supposition* De Rijk's *Logica Modernorum* provides the basis for the modern study of medieval theories of supposition Now nearly 50 years later scholars have made great progress in the study of the properties of terms De Rijk's study was primarily about the early development of terminist logic i.e. during the 12th and 13th centuries Scholars have also investigated later developments well into the sixteenth and seventeenth centuries Not only logical texts but also texts on grammar have been published Many of the scholars who have contributed to this development present papers in this volume Contributors are Fabrizio Amerini Jenny Ashworth Allan Bäck Bert Bos Julie Brumberg Chaumont Laurent Cesalli Lambert Marie de Rijk Sten Ebbesen Alessandro Conti Catarina Dutilh
