With its unique Tender Index it is the only price book that publishes details of its cost base in a way allowing adjustments for market conditions that affect building prices. The 2005 edition includes the following new items: acrylic water based emulsion paints, additional insulation boards and quilts, green items and head and wall restraints among others. **Investing in International Real Estate** M. A. Hines, 2000-10-30. With numerous cogent examples from real estate markets worldwide, Dr Hines makes it clear that investing in foreign real estate is by no means the same as investing domestically. She shows how, why and when special strategies must be devised to enter the world market, conveys essential information on global investment opportunities, outlines career opportunities and advancement strategies in international investment and provides insights into international business in the context of global real estate investing. Her focus on industrial, commercial and residential real estate reflects both the major investment interests of world class investment professionals and the diversity of real estate market conditions. Her book is thus an essential resource for professional real estate investors, teachers and their graduate level students. Dr Hines focuses on the general investment strategies that successful and profitable international real estate investors have devised over many years and now follow assiduously. Readers gain knowledge of direct investment in industrial, commercial and residential real estate and through the purchase of securities such as real estate investment trusts and mortgage backed issues. After discussing basic international real estate differences and general acquisition strategies, the book moves to functional strategies such as valuation, land development, construction financing and tax strategies. Dr Hines concludes with a coverage of housing and shopping centers, office buildings and industrial property investment, all of which allow readers to observe the differences among functional areas and then tie them to the differences among investments in various types of properties. Her book covers Western, Eastern and Central Europe, East, Southeast, Central and South Asia, Africa in general and Morocco in Northwest Africa in particular, plus the Middle East and North and South America. *Spons' Architects' and Builders' Pocket-book of Useful Memoranda and Prices* William Young, 1877. **Spons' Architects' And, Architect Builders' Pricebook** W.
