Sport Science in Germany Herbert Haag,Ommo Grupe,August Kirsch,2012-12-06 In the scientific theory of sport science four major questions can be considered 1 What is the function of science 2 What is the body of knowledge of a

scientific field 3 What is the appropriate research methodology 4 How are research results applied to the practical field This publication structures the body of knowledge of German sportscience and focuses on the second question Answers to the other questions are given implicitly within the articles relating to the specific subdisciplines of sport science *German Sports, Doping, and Politics* Michael Krüger, Christian Becker, Stefan Nielsen, 2015-04-09 In the Cold War era sport was not just a symbol of the power and strength of a nation state but of certain ideological systems of politics With the pressure for athletes to succeed at its zenith many East German athletes were given anabolic steroids by their country's own sport federation While doping in East Germany has been intensely researched in the past decades the state of West German athletics during this time has remained largely a mystery In fact doping was a common practice on both sides of the Iron Curtain But how many athletes were involved And who knew about these practices In order to answer these questions the Federal Institute for Sport Science in Germany supported a research project to shed light on the other West German side of doping history Based on analyses of authentic documents and archives *German Sports Doping and Politics A History of Performance Enhancement* is a unique study spanning from 1950 2007 Translated from its original German and supplemented with new material written especially for an international audience this innovative book addresses many important questions about a topic with worldwide implications Part I deals with the history of doping in the post war period of the 1950s and 60s Part II focuses on the apex of doping as well as the beginnings of the anti doping movement and Part III considers the development of doping since the Reunification and the foundation of the World Anti Doping Agency and the National Anti Doping Agency in Germany Written for a global audience *German Sports Doping and Politics* explains and reveals the truly remarkable processes of doping and anti doping that have evolved since the Cold War While sports historians will find this book of great interest it is also a significant study for anyone who wants to look beyond the surface of sports and doping as reported by the media **Turnen and Sport** Annette R. Hofmann, An international group of authors contributed eleven articles to this edition with an interdisciplinary approach The authors belong to different scientific fields such as general history and sport history sport pedagogy library sciences and German and American studies They all do research on turnen and sport in Germany and the United States *Culture, Sport, and Physical Activity* Karin A.
