Weddell,2021-11-17 Synopsis This book is about the information that is needed to catch fish but more importantly it is about
adopting the right mind set to help us be more successful fly fishers There are many factors to be considered when trying to
catch trout on a fly weather state of the water what the trout are feeding on the list is endless But having all this information
does not ensure success as the final but rarely recognised factor how we use the information is paramount How we use the
information is determined by how we think and no two anglers think in exactly same All the information is freely available yet
some anglers consistently catch more fish than others and it is how they think that makes the difference
