Preface Performing warm ups before any high intensity physical activity sports or exercises is important in a multitude of ways A good fulfilling session of warm up exercises will make sure that the body does not go into the energy demanding phase of an exercise or workout too swiftly There will be a gradual increase in your heart rate which will steadily increase the flow of blood in your muscles and other parts of the body preparing you both physically and mentally for an injury free exercise The importance of a workout can be compared simply to the analogy of a car being driven in cold weather what people tend to do is allow their cars to warm up before picking up high speeds The same principle in a slightly modified sense applies to a workout For a strenuous and demanding workout its best to physically prepare yourself by steadily increasing the body s temperature with patience By giving your body a nice warm up with many of the techniques like jogging walking etc you are in fact improving blood circulation within different joints muscles and tendons much like oiling a squeaky wheel With the increased blood flow the heart rate also rises and the muscles warm up to prevent any injury from taking place Moreover warm up exercises also have a psychological affect and they prepare your brain by easing it into the physical activities that are soon to follow This is extremely helpful in exercises like weight lifting high intensity running and aerobics The body and mind thus synchronize and ease into the workout making sure that no part of the body faces any injury as a result of the exercises that are soon to follow Keep reading on and find out the details of a warm up

**Warm-ups for Musicians** Emma Fleet,2021 Context Many musicians experience playing related pain and injuries One of the recommended injury prevention strategies is to warm up prior to playing a musical instrument However this recommendation is not always supported with empirical data Additionally multiple terms are used to describe warm ups and may differ between authors creating confusion around this injury prevention strategy Objectives The objectives of this thesis are to search for evidence based studies that would support the benefit of warm ups for musicians reduce the confusion around musicians warm ups and bring clarity to the definition of warm up Methodology In order to do so this thesis presents two studies The first study consisted of doing a systematized review of English published articles in order to identify if there was evidence to support the statement that warm ups prevent injury The methodology and results of each included article were evaluated using the American Academy for Cerebral Palsy and Developmental Medicine AACPDm s levels of evidence The second article consisted of a terminology review and taxonomy in order to identify terms organize them into categories and define warm

ups The corpus contained the same articles that were included in the systematized review Terms were identified from the corpus and the most frequently mentioned terms were used for the definition of warm up Terms were also categorized in a taxonomy in order to illustrate the different types of warm ups that are recommended to musicians Results Twenty nine studies were included in the analysis of the systematic review Of these 29 studies only one ranked at level I which is the highest level of evidence and most studies ranked at level V The one study that was ranked at level I indicated that all three tested warm up conditions did not have a muscular effect Therefore at the moment there seems to be no evidence that supports the statement that warm ups prevent injury The terminology review led to the following definition of warm up A routine habit or exercise s that is are completed prior to playing repertoire or learning new material on a music instrument in order to prepare physically and mentally the musician The following can be included as part of a musician s warm up physical warm up completed without the instrument for example stretches musical warm up completed with the instrument for example scales familiar tune favorite tune long tones and psychological warm up It was also determined that stretching should also be defined as it is not always perceived as a warm up Stretching was defined as Slow controlled and progressive movements that are maintained for at least 20 30 seconds These are done at various intervals throughout the day such as prior during breaks and after the practice of a music instrument They are referred to as physical exercises away from the instrument The following are some examples of stretching exercises wrist rotations forward neck roll oppositional finger wrist press hand finger extensions fist clench and unclench arms bicep curls handshakes arms triceps extension and fingers clenched and unclenched The taxonomy indicated three warm up categories physical musical and psychological The physical and musical warm ups were then subcategorized It was not possible to subcategorize psychological warm ups due to a lack of definition and examples in the literature This study was a first step towards standardization but further research is necessary in order to standardize a methodology and protocol *Warm Up and Preparation for Athletes of All Sports* Z.
