*Children's Literature Aligned with SDGs to Promote Global Competencies* Angela K. Salmon, Aixa Pérez-Prado, Karin Morrison, Flavia Iuspa, 2024-05-23 This book presents children's literature as a platform for learning and helping young readers develop the knowledge, skills and attitudes needed to thrive in an interconnected and diverse global society. It draws from various theoretical frameworks and research findings to implement critical literacy and culturally responsive teaching in the meaning-making process. The book focuses on global competencies and Sustainable Development Goals (SDGs) as intertwined concepts that work together to foster a more sustainable, inclusive and equitable world. Developing global competencies empowers children and communities to actively participate in achieving the SDGs and addressing the pressing challenges of our time. The authors set high expectations on children as actors in transforming society. To facilitate this, the book offers an overview of child development theories as a foundation for designing developmentally appropriate practices to extend children's books toward deep thinking and understanding. The book includes sample lessons that use cutting-edge research-based pedagogies and tools such as visible thinking routines and other approaches. Those lessons also help readers identify the Habits of Mind (HOM) children can develop by listening to and discussing stories. The HOMs are attributes of good problem finders and problem solvers needed when confronting complex issues. The book provides resources and sample lessons that implement different thinking strategies to engage children in questioning and analyzing what they read, making them more critical. This is how children deeply understand the world and their role in creating positive change. The book aims to cultivate change makers and global citizens through stories. It offers innovative approaches including online learning options in accessible and engaging ways to help children think globally and act locally. Through the power of children's literature, this book serves a larger agenda: To build a more thoughtful world for future generations. By caring for and learning from one another through suggested activities in this book, they will share the riches and resources from across the world. As children learn about the promise of actions toward the UN Sustainable Goals, they can imagine living in an interdependent learning community where all people continually searching for ways to trust each other, learn together and grow toward greater intelligence. **Transforming Nursery Education** Peter Moss, Helen Penn, 1996-03-28 This is an important publication which I urge colleagues to read and to consider carefully all the implications. *Early Years* This provocative analysis with its clear examples is worth reading for its fresh look at where we could be headed come the 21st century. Nursery Equipment Early childhood services in the UK have been badly neglected. The consequences are serious: chronic underfunding and increasing fragmentation, most staff poorly paid and trained, access often a matter of potluck and money, low aspirations and even lower expectations. Increasingly young children are seen as important for what they may become rather than for what they are, and the case for early childhood services is made out in terms of later performance in school and adult life rather than the needs

and rights of young children themselves No current political vision redresses this undervaluing of early childhood or addresses the parlous state our early childhood services are in Drawing on the rich early childhood tradition in the UK going back to Robert Owen and giving examples from current practice Transforming Nursery Education offers a critique of the status quo a vision of early childhood services and practical strategies for achieving it The book covers a wide range of day care and education services and critical issues such as staffing funding curriculum models of provision and the age at which children start compulsory schooling Within this broad approach the book focuses in particular on the history and current practice of nursery education It argues that the present narrow approach to nursery education is neither appropriate to the needs of today nor inevitable It answers a critical question how can nursery education be transformed to play a leading role in the comprehensive integrated and coherent early childhood service that today s families really need **A Year of**
