refreshing look at what may be both the meaning of life and the reason for its creation It argues that life on earth and in fact our human consciousness are universal entities A model is presented that assumes our universe is a tiny part of a multiverse arguing that the multiverse is a hierarchical structure each level a reproductive system of intelligent living systems on the next higher level We take a fictional look at our parent species on that next higher level to find they are far more complex creatures than us but their universe is older and will soon run out of fuel to then die Parent species know that to preserve their life and the billions of years of heritage they created they must reproduce on a lower multiverse level This we believe is why humans have developed many features such as a large brain that make our survival on earth more difficult Yet these features have evolved because they are needed by the reproductive system of the parent species from lulu com *The Gutless Wonder* Tom Rooney,2013-04 *The Gutless Wonder* is a true story of a young man faced with terrific pressures from secrets about his family He kept this within himself and sought out the venue of playing high school football His determination and will to never quit made it possible for him to achieve success under great physical and mental barriers that could not be understood by most everyone around him His tragedies and accomplishments are detailed in the story and would give others a path to imitate if faced with similar situations *Spartianus* Ian S.
