**Team Performance in Health Care** Gloria D.

Heinemann, Antonette M. Zeiss, 2012-12-06 The idea of teamwork in health care emerged at several times during the 20th century as the result of shifts in the nature and demands of health care and societal needs. Examples include medical and surgical teams serving the military in World War II, primary care teams staffing Community Health Centers created by President Johnson's War On Poverty, and geriatric care teams established to serve the rapidly growing number of aging citizens. Collaborative teamwork surfaced as a rational solution to health care needs, but political and economic consensus to support widespread implementation was lacking. The increasing complexity of providing health care seemed best served by the skills and efforts of interdisciplinary teams, but such care was viewed as expensive, so the evaluation of its effectiveness became essential. There were major problems in conducting such evaluation, however. First, no clear theory guided the concept and practice of teamwork. Early attempts to employ theoretical constructs explaining the behavioral and organizational phenomena of teamwork borrowed from theories of group dynamics, communication, organizational development, and general systems. Further, few reliable, validated instruments existed to evaluate team process, function, or effectiveness. The best early efforts at research and evaluation came from academic centers funded by the Office of Interdisciplinary Programs of the Bureau of Health Professions, 1975-78, and from the Veterans Affairs Interprofessional Team Training Development Program.

**Safer Systems** Felix Redmill, Tom Anderson, 2012-12-06 The contributions to this book are the invited papers presented at the fifth annual Safety critical Systems Symposium. They cover a broad spectrum of issues affecting safety, from a philosophical appraisal to technology transfer, from requirements analysis to assessment, from formal methods to artificial intelligence and psychological aspects. They touch on a number of industry sectors but are restricted to none, for the essence of the event is the transfer of lessons and technologies between sectors. All address practical issues and offer useful information and advice. Contributions from industrial authors provide evidence of both safety consciousness and safety professionalism in industry. Smith's on safety analysis in air traffic control and Rivett's on assessment in the automotive industry are informative on current practice. Frith's thoughtful paper on artificial intelligence in safety critical systems reflects an understanding of questions which need to be resolved. Tomlinson's, Alvery's, and Canning's papers report on collaborative projects: the first on results which emphasise the importance of human factors in system development, the second on the development and trial of a comprehensive tool set, and the third on experience in achieving technology transfer, something which is crucial to increasing safety.

*Marketing Issues in Pacific Area Tourism* Kaye Sung Chon, Chris Ryan, John C. Crofts, 2014-01-09 Marketing Issues in Pacific Area Tourism exposes researchers, tourism professionals and students to the complexities of marketing issues in the most dynamic region in world tourism today. Dispelling commonly held Western assumptions, inviting new research and stressing the importance of tourism development in this area to the economics of world tourism, this book shows you how and why this region has experienced such tremendous growth. Some of the larger countries you learn about include China, Hong Kong, Japan, Korea, Malaysia, Singapore, Taiwan and Thailand. Since many of these countries are becoming not only generators of tourist demand but also new tourist receiving areas, this book covers both inbound and outbound markets. By discussing the opportunities and challenges facing tourism marketing professionals and researchers in the Pacific area, Marketing Issues in Pacific Area Tourism helps improve your effectiveness and understanding of conducting business in the Pacific region. Some of the factors you read about include the increasing wealth and consumerism of a rapidly growing middle class in the Pacific area, the relaxation of international travel restrictions, how formerly insular governments of the region are awakening to the possibility of tourism, the potential impediments to sustainable tourism development in the region. Marketing Issues in Pacific Area Tourism also helps you improve survey design and interpretation by stressing the importance of understanding the heterogeneous nature of Asian culture when analyzing tourist behavior and motivation. It provides a different perspective of Pacific Region tourism, concentrating on the clash of culture between those of the region and a dominant Western way of doing business. Another valuable feature of this book is

the presentation of a continuing and improving database from which to assess destination performance and visitor characteristics thus allowing researchers to further identify important marketing opportunities and issues
