Applying Social Statistics Jay Weinstein, 2010-01-15 While Applying Social Statistics is about social statistics and includes all of the topics generally covered in similar texts it is first and foremost a book about how sociologists use statistics Its emphasis is on statistical reasoning in sociology and on showing how these principles can be applied to numerous problems in a wide variety of contexts to answer effectively the question what s it for A main learning objective is to help students understand how and why social statistics is used Yet Weinstein s style and substance recognize that it is of equal or even greater importance that they begin to learn how to apply these principles and techniques themselves Strengthening Policy Analysis Lawrence James Haddad, 1995-01-01 **The American Family** Josefina J. Card, 2019-06-03 This compendium is one of a series of social science research and teaching resources created by the American Family Data Archive at Sociometrics Corporation It describes 28 data sets chosen by a panel of scientist experts as having outstanding potential for secondary data analysis on issues facing today s American family General Technical Report NE , 1980 Proceedings of the 1998 Northeastern Recreation Research Symposium, April 5-7, 1998, the Sagamore on Lake George in Bolton Landing, New York Hans G. Playback and Studies of Animal Communication Peter K. McGregor, 2013-11-11 Playback is the technique of rebroadcasting natural or synthetic signals to animals and observing their response. The ability to present a putative signal in isolation without the potential confounding effects of other activities of the signaller is the main reason for the depth and range of our knowledge of communication systems. To date playback of sound signals has predominated but playback of electric signals and even video playback of visual signals suggests that playback will become just as prevalent in studies of communication in other sensory modalities. This book is one of the outcomes of a workshop on playback held at Thombridge Hall in the Peak District National Park, England, during August 1991. There were two reasons for organising the workshop. First, the considerable and lively debate in the literature about the design and analysis of playback experiments, the pseudoreplication debate, was in danger of generating more heat than light. A workshop forum seemed the obvious place to clarify and, if possible, resolve the debate. Second, with the number of new playback and analysis techniques increasing rapidly, it seemed an opportune moment to discuss these techniques and to review some rapidly developing areas of interest in sound communication. **PC Magazine**, 1996 *domestic demand for agricultural products in Costa Rica*, **Behavioural and Mental Health Research** Glenys Parry, Fraser N. Watts, 1996 This is a revised, updated and expanded version of a guide to research skills for psychologists, psychiatrists, nurses, social workers and graduates training in those disciplines.

Statistical Methods for the Assessment of Point Source Pollution D.T. Chapman, A.H. El-Shaarawi, 1989-12-31 This book contains the proceedings of a workshop, Statistical Methods for the Assessment of Point Source Pollution, held September 12-14, 1988, at the Canada Centre for Inland Waters in Burlington, Ontario, Canada. The objectives of the workshop were to advance the art, science and application of statistical methods to current water quality issues by stimulating discussions and disseminating ideas and information. The emphasis was on statistical problems associated with monitoring and controlling discharges from industries and municipalities and assessing the impact of these discharges on receiving water quality. b) provide a forum for managers, engineers, scientists and statisticians to present and discuss techniques for evaluating water quality data and planning monitoring activities. c) provide a published state-of-the-art summary of the application of statistical methods for the assessment of point source discharges and their impact on water quality. The papers contained in this volume cover a number of topics that are of concern not only for monitoring and assessing point source pollution but also for other environmental problems. **PC Mag**, 1989-03-14 PCMag.com is a leading authority on technology, delivering lab-based independent reviews of the latest products and services.
