[Recent Library Additions](#), 1985 [Applied Statistics and Multivariate Data Analysis for Business and Economics](#) Thomas Cleff, 2025-03-05 This comprehensive textbook equips students of economics and business as well as industry professionals with essential principles, techniques, and applications of applied statistics, statistical testing, and multivariate data analysis. Through real-world business examples, it illustrates the practical use of univariate, bivariate, and multivariate statistical methods. The content spans a broad range of topics, from data collection and scaling to the presentation and fundamental univariate analysis of quantitative data, while also demonstrating advanced analytical techniques for exploring multivariate relationships. The book systematically covers all topics typically included in university-level courses on statistics and advanced applied data analysis. Beyond theoretical discussion, it offers hands-on guidance for using statistical software tools such as Excel, SPSS, Stata, and R. In this completely revised and updated second edition, new sections on logistic regression are included, along with enhanced examples and solutions using R for all covered statistical methods. This edition provides a robust resource for mastering applied statistics in both academic and professional settings.

Multilevel Modeling of Categorical Outcomes Using IBM SPSS Ronald H Heck, Scott Thomas, Lynn Tabata, 2013-05-07 This is the first workbook that introduces the multilevel approach to modeling with categorical outcomes using IBM SPSS Version 20. Readers learn how to develop, estimate, and interpret multilevel models with categorical outcomes. The authors walk readers through data management, diagnostic tools, model conceptualization, and model specification issues related to single-level and multilevel models with categorical outcomes. Screen shots clearly demonstrate techniques and navigation of the program. Modeling syntax is provided in the appendix. Examples of various types of categorical outcomes demonstrate how to set up each model and interpret the output. Extended examples illustrate the logic of model development, interpretation of output, the context of the research questions, and the steps around which the analyses are structured. Readers can replicate examples in each chapter by using the corresponding data and syntax files available at www.psyppress.com 9781848729568. The book opens with a review of multilevel modeling with categorical outcomes, followed by a chapter on IBM SPSS data management techniques to facilitate working with multilevel and longitudinal data sets. Chapters 3 and 4 detail the basics of the single-level and multilevel generalized linear model for various types of categorical outcomes. These chapters review underlying concepts to assist with troubleshooting common programming and modeling problems. Next, population average and unit-specific longitudinal models for investigating individual or organizational developmental

processes are developed Chapter 6 focuses on single and multilevel models using multinomial and ordinal data followed by a chapter on models for count data The book concludes with additional trouble shooting techniques and tips for expanding on the modeling techniques introduced Ideal as a supplement for graduate level courses and or professional workshops on multilevel longitudinal latent variable modeling multivariate statistics and or advanced quantitative techniques taught in psychology business education health and sociology this practical workbook also appeals to researchers in these fields An excellent follow up to the authors highly successful Multilevel and Longitudinal Modeling with IBM SPSS and Introduction to Multilevel Modeling Techniques 2nd Edition this book can also be used with any multilevel and or longitudinal book or as a stand alone text introducing multilevel modeling with categorical outcomes

A Practical Guide to Teaching Research Methods in Education Aimee LaPointe Terosky, Vicki L. Baker, Jeffrey C. Sun, 2023-03-23 A Practical Guide to Teaching Research Methods in Education brings together more than 60 faculty experts The contributors share detailed lesson plans about selected research concepts or skills in education and related disciplines as well as discussions of the intellectual preparation needed to effectively teach the lesson Grounded in the wisdom of practice from exemplary and award winning faculty from diverse institution types career stages and demographic backgrounds this book draws on both the practical and cognitive elements of teaching educational and related research to students in higher education today The book is divided into eight sections covering the following key elements within education and related research problems and research questions literature reviews and theoretical frameworks research design quantitative methods qualitative methods mixed methods findings and discussions and special topics such as student identity development community and policy engaged research and research dissemination Within each section individual chapters specifically focus on skills and perspectives needed to navigate the complexities of educational research The concluding chapter reflects on how teachers of research also need to be learners of research as faculty continuously strive for mastery identity and creativity in how they guide our next generation of knowledge producers through the research process Undergraduate and graduate professors of education and related research courses dissertation chairs committee members faculty development staff members and graduate students would all benefit from the lessons and expert commentary contained in this book

Social Work Research Skills Workbook Jacqueline Corcoran, Mary Secret, 2012-08-17 The required research sequence is perhaps the most dreaded element of a BSW or MSW program for students who don't see the applicability of research methods and data analysis to the real world of practice With the move toward greater accountability and evidence informed practice though students must be well equipped to be not only consumers but producers of research Increase student research comfort and competency with the Social Work Research Skills Workbook a hands on practical guide that shows students how to apply what they learn about research methods and analysis to the research projects that they develop in their internships field placements or employment settings At once a survival guide to the research requirement and a toolbox that practitioners can use in the
