*Spying with Maps* Mark Monmonier, 2004-04 Maps as we know help us find our way around But they re also powerful tools for someone hoping to find you Widely available in electronic and paper formats maps offer revealing insights into our movements and activities even our likes and dislikes In *Spying with Maps* the mapmatician Mark Monmonier looks at the increased use of geographic data satellite imagery and location tracking across a wide range of fields such as military intelligence law enforcement market research and traffic engineering Could these diverse forms of geographic monitoring he asks lead to grave consequences for society To assess this very real threat he explains how geospatial technology works what it can reveal who uses it and to what effect Despite our apprehension about surveillance technology *Spying with Maps* is not a jeremiad crammed with dire warnings about eyes in the sky and invasive tracking Monmonier s approach encompasses both skepticism and the acknowledgment that geospatial technology brings with it unprecedented benefits to governments institutions and individuals especially in an era of asymmetric warfare and bioterrorism Monmonier frames his explanations of what this new technology is and how it works with the question of whether locational privacy is a fundamental right Does the right to be left alone include not letting Big Brother or a legion of Little Brothers know where we are or where we ve been What sacrifices must we make for homeland security and open government With his usual wit and clarity Monmonier offers readers an engaging even handed introduction to the dark side of the new technology that surrounds us from traffic cameras and weather satellites to personal GPS devices and wireless communications

of literary space and place centred upon the emergence of a fictional map alongside the text in the late nineteenth and early twentieth centuries Bringing together a range of new and emerging theories including cognitive mapping and critical cartography Bushell compellingly argues that this activity whatever it is called mapping diagramming visualising spatialising is a vital and intrinsic part of how we experience literature and of what makes it so powerful Drawing on both the theory and history of literature and cartography this richly illustrated study opens up understanding of spatial meaning and interpretation in new ways that are relevant to both more traditional academic scholarship and to newly emerging digital practices
