Health and the Construction of the Individual Jane Ogden, 2023-05-26 How do social scientists create facts What strategies do they use to construct knowledge How does social science make sense of the individual Critical studies of both medical and scientific knowledge have been conducted but social science knowledge remains relatively unquestioned Addressing this question Health and the Construction of the Individual originally published in 2002 is a social study of social science Jane Ogden focuses particularly on constructions of the individual in health related psychology and sociology She explores how social science texts construct social science facts

using the strategies of theory methodology measurement and rhetorical boundaries and argues that the individual is not only constructed through the dissemination of social science knowledge but through the mechanics of its production The results provide a unique insight into the transformation of the individual as an ever changing self from both a historical and social constructionist perspective This title will make fascinating reading for health psychologists medical sociologists social constructionists and all students and researchers interested in gaining a greater understanding of the premises underlying social science *Science and Social Science* Malcolm Williams,2012-10-02 Is social science really a science at all and if so in what sense This is the first question that any course on the philosophy of the social sciences must tackle In this brief introduction Malcolm Williams gives students the grounding that will enable them to discuss the issues involved with confidence He looks at The historical development of natural science and its distinctive methodology the case in favour of an objective science of the social which follows the same rules The arguments of social constructionists interpretative sociologists and others against objectivity and even science itself recent developments in natural science for instance the rise of complexity theory and the increased questioning of positivism which bring it closer to some of the key arguments of social science Throughout the book is illustrated with short clear examples taken from the actual practice of social science research and from popular works of natural science which will illuminate the debate for all students whatever their background

**Discursive Psychology** Cristian Tileagă, Elizabeth Stokoe, 2015-08-27 Discursive Psychology is the first collection to systematically and critically appraise the influence and development of its foundational studies exploring central concepts in social psychology such as attitudes gender cognition memory prejudice and ideology The book explores how discursive psychology has accommodated and responded to assumptions contained in classic studies discussing what can still be gained from a dialogue with these inquiries and which epistemological and methodological debates are still running or are worth reviving International contributors look back at the original ideas in the classic papers and consider the impact on and trajectory of subsequent work Each chapter locates a foundational paper in its academic context identifying

the concerns that motivated the author and the particular perspective that informed their thinking The contributors go on to identify the main empirical theoretical or methodological contribution of the paper and its impact on consequent work in discursive psychology including the contributors own work Each chapter concludes with a critical consideration of how discursive psychology can continue to develop This book is a timely contribution to the advance of discursive psychology by fostering critical perspectives upon its intellectual and empirical agenda It will appeal to those working in the area of discursive psychology discourse analysis and social interaction including researchers social psychologists and students

Discourse, Ideology and Specialized Communication Giuliana Garzone, Srikant Sarangi, 2008 This book approaches the issue of ideology in specialized communication in professional institutional and disciplinary settings across domains as diverse as law healthcare corporate management migration NGOs etc What unites the contributors is their commitment to a discourse view of language use i e the view that organisational and professional practices are rooted in social ideological orders although a variety of perspectives on the exact nature of the relationship between ideology and discourse can be discerned in individual chapters The acts of interpretation by participants and analysts alike are invested in ideology explicitly or implicitly This manifest hidden duality surrounding ideology in discourse constitutes the main focus Challenging the traditional presumption of objectivity impersonality and non involvement that has often characterized research on Language for Specific Purposes this book demonstrates how the specialized communication setting is a critical site where ideology is intrinsically embodied in discursive practices

**Realism and Complexity in Social Science** Malcolm Williams, 2020-12-30 Realism and Complexity in Social Science is an argument for a new approach to investigating the social world that of complex realism Complex realism brings together a number of strands of thought in scientific realism complexity science probability theory and social research methodology It proposes that the reality of the social world is that it is probabilistic yet there exists enough invariance to make the discovery and explanation of social objects and causal mechanisms possible This forms the basis for the development of a complex realist foundation for social research that utilises a number of new and novel approaches to investigation alongside the more traditional corpus of quantitative and qualitative methods Research examples are drawn from research in sociology epidemiology criminology social policy and human geography The book assumes no prior knowledge of realism probability or complexity and in the early chapters the reader is introduced to these concepts and the arguments against them Although the book is grounded in philosophical reasoning this is in a direct and accessible style that will appeal both to social researchers with a methodological interest and philosophers with an interest in social investigation

**Citizen Science** Alan Irwin, 2002-01-10 We are all concerned by the environmental threats facing us today Environmental issues are a major area of concern for policy makers industrialists and public groups of many different kinds While science seems central to our understanding of such threats the statements of scientists are increasingly open to challenge in this area Meanwhile citizens may find themselves labelled as ignorant in

environmental matters In *Citizen Science* Alan Irwin provides a much needed route through the fraught relationship between science the public and the environmental threat

**Speaking Power to Truth** Michael Keren, Richard Hawkins, 2015-11-20

Online discourse has created a new media environment for contributions to public life one that challenges the social significance of the role of public intellectuals intellectuals who whether by choice or by circumstance offer commentary on issues of the day The value of such commentary is rooted in the assumption that by virtue of their training and experience intellectuals possess knowledge that they understand what constitutes knowledge with respect to a particular topic are able to distinguish it from mere opinion and are in a position to define its relevance in different contexts When intellectuals comment on matters of public concern they are accordingly presumed to speak truth whether they are writing books or op ed columns or appearing as guests on radio and television news programs At the same time with increasing frequency discourse on public life is taking place online This new digital environment is characterized by abundance an abundance of speakers discussion and access But has this abundance of discourse this democratization of knowledge as some describe it brought with it a corresponding increase in truth Casting doubt on the assertion that online discourse with its proliferation of voices will somehow yield collective wisdom *Speaking Power to Truth* raises concerns that this wealth of digitally enabled commentary is in fact too often bereft of the hallmarks of intellectual discourse an epistemological framework and the provision of evidence to substantiate claims Instead the pursuit of truth finds itself in competition with the quest for public reputation access to influence and enhanced visibility But as knowledge is drawn into the orbit of power and as the line between knowledge and opinion is blurred what role will the public intellectual play in the promotion and nurturing of democratic processes and goals In exploring the implications of the digital transition the contributors to *Speaking Power to Truth* provide both empirical evidence of and philosophical reflection on the current and future role of the public intellectual in a technologically mediated public sphere Contributions by Barry Cooper Jacob Foster Karim Ally Kassam Boaz Miller Liz Pirnie and Eleanor Townsley
