Sodoms In Eden The City In American Fiction Before 186:

The Land Before Her Annette Kolodny, 2014-07-01 To discover how women constructed their own mythology of the West Kolodny examines the evidence of three generations of women's writing about the frontier She finds that although the American frontiersman imagined the wilderness as virgin land an unspoiled Eve to be taken the pioneer woman at his side dreamed more modestly of a garden to be cultivated Both intellectual and cultural history this volume continues Kolodny's study of frontier mythology begun in *The Lay of the Land*

The American City Nazrul Islam, Fakrul Alam, 1991 City from the perspectives of social science and literature

In Union There Is Strength Andrew Heath, 2019-02-08 In the 1840s Philadelphia was poised to join the ranks of the world's great cities as its population grew its manufacturing prospered and its railroads reached outward to the West Yet epidemics of riot disease and labor conflict led some to wonder whether growth would lead to disintegration As slavery and territorial conquest forced Americans to ponder a similar looming disunion at the national level Philadelphians searched for ways to hold their city together across internal social and sectional divisions a project of consolidation that reshaped their city into the boundaries we know today A bold new interpretation of a crucial period in Philadelphia's history *In Union There Is Strength* examines the social and spatial reconstruction of an American city in the decades on either side of the American Civil War Andrew Heath follows Philadelphia's fortunes over the course of forty years as industrialization immigration and natural population growth turned a Jacksonian era port with a population of two hundred thousand into a Gilded Age metropolis containing nearly a million people Heath focuses on the utopian socialists civic boosters and municipal reformers who argued that the path to urban greatness lay in the harmonious consolidation of jarring interests rather than in the atomistic individualism we have often associated with the nineteenth century metropolis Their rival visions drew them into debates about the reach of local government the design of urban space the character of civic life the power of corporations and the relations between labor and capital and ultimately became entangled with the question of national union itself In tracing these links between city making and nation making in the mid nineteenth century *In Union There Is Strength* shows how its titular rallying cry inspired creative contradictory and fiercely contested ideas about how to design build and live in a metropolis

Ecology of Fear Mike Davis, 2014-01-14 Rich with detail bold and original Mike Davis's *Ecology of Fear* is a gripping reconnaissance into the urban future an essential portrait of America at the millennium Los Angeles has become a magnet for the American apocalyptic imagination Riot fire flood earthquake only locusts are missing from the almost biblical list of disasters that have struck the city in the 1990s From Ventura to Laguna more than one million Southern Californians have been directly touched by disaster related death injury or damage to their homes and businesses Middle class apprehensions about angry underclasses are exceeded only by anxieties about blind thrust faults underlying downtown L A or about the firestorms that periodically incinerate Malibu And the force of real catastrophe has been redoubled by the obsessive fictional destruction of Los Angeles by aliens comets and twisters in scores

of novels and films The former Land of Sunshine is now seen by much of the world including many of L A s increasingly nervous residents as a veritable Book of the Apocalypse theme park In this extraordinary book Mike Davis the author of City of Quartz and our most fascinating interpreter of the American metropolis unravels the secret political history of disaster real and imaginary in Southern California As he surveys the earthquakes of Santa Monica the burning of Koreatown the invasion of man eating mountain lions the movie Volcano and even Los Angeles s underrated tornado problem he exposes the deep complicity between social injustice and perceptions of natural disorder Arguing that paranoia about nature obscures the fact that Los Angeles has deliberately put itself in harm s way Davis reveals how market driven urbanization has for generations transgressed against environmental common sense And he shows that the floods fires and earthquakes reaped by the city were tragedies as avoidable and unnatural as the beating of Rodney King and the ensuing explosion in the streets

Girls who Went Wrong Laura Hapke,1989 The period 1885 to 1917 saw thousands of American crusaders working hard to save the fallen women but little on the part of American social protest writers In this first work on the subject Laura Hapke examines how writers attempted to turn an outcast into a heroine in a literature otherwise known for its puritanical attitude toward the fallen woman She focuses on how these authors all male expressed late Victorian conflicts about female sexuality If as they all maintained women have an innate preference for chastity how could they account for the prostitute Was she a sinner suggesting the potential waywardness of all women Or if she was a victim what of her depravity Hapke reevaluates Crane s famous Maggie A Girl of the Streets discusses neglected prostitution fiction by authors Joaquin Miller Edgar Fawcett and Harold Frederic and surveys Progressive white slave novels She draws on a number of period sources among them urban guidebooks and medical treatises to place the fiction in its cultural context

Cities Perceived Andrew Lees,1985 This is a serious and valuable contribution to the vast literature of urbanism Journal of European Studies Although the social and economic aspects of modern urbanization are readily apparent the impact of city growth on ideas and attitudes rarely receives the attention it deserves In Cities Perceived Andrew Lees fills this research gap by examining a number of trends including the cultural assimilation of European and American urbanization in the nineteenth and early twentieth centuries and the common view on the effects of rural and urban migration during the Industrial Revolution He additionally analyzes the variances among the perceptions of urban life based on decade country occupation and social group Lees also offers insight on how urban problems both stem from and stimulate the efforts that are intended to address them Drawing from a wide range of sources Lees illuminates the complex fears and enthusiasms aroused by the rapid growth of cities in the nineteenth and early twentieth centuries A comparative framework encompasses developments in America as well as in Britain France and Germany in addition to evidence of ambivalent as well as strongly positive attitudes toward urbanization that complement the more familiar theme of hostility common in previous writing Cities Perceived is a scholarly overview of one of the fundamental transformations of the age This groundbreaking work on social and cultural history is essential

reading for urban historians and students of literature and sociology Andrew Lees has been a member of the Rutgers Camden faculty since 1974 He teaches broadly in the areas of European and comparative European American history
