Software Of The Self Technology And Culture

Hugh Mackay, Tim O'Sullivan

Software Of The Self Technology And Culture:

Software for the Self Anthony Smith,1996 In this volume which is based on the 1994 T S Eliot Lectures the author places contemporary issues such as the effect of modern technology on society and the individual in the context of much longer discussions about the nature and role of the arts A much longer historical process is at work by which culture is constantly undergoing re definition as is the whole of our apparatus of response Smith argues for example that the roots of virtual reality are to be sought in older western conceptions of space and in techniques of representing space Software Applications: Concepts, Methodologies, Tools, and Applications Tiako, Pierre F.,2009-03-31 Includes articles in topic areas such as autonomic computing operating system architectures and open source software technologies and applications

The Politics and Possibilities of Self-Tracking Technology Suneel Jethani,2021-06-18 The Politics and Possibilities of Self Tracking Technology focuses on the dialectical relationship between users and designers of wearable technology to examine how datafication processes redefine the body and explores what this means for the design administration and study of self tracking systems

De Gruyter Handbook of Digital Cultures Grant Bollmer, Katherine Guinness, Yiğit Soncul, 2025-09-22 As Digital Cultures becomes the dominant term used by many across a variety of intellectual fields to describe the social aesthetic and political impact of digital media it is necessary to provide a reference volume that specifies and defines the bounds of scholarly debates and curricular outlines for an otherwise amorphous interdisciplinary space This handbook provides a comprehensive reference for the varied methodologies historical frames and theoretical perspectives essential for the study of Digital Cultures today In outlining these foundations it serves as a practical guide for educators and students into the broad range of perspectives grouped together for the critical historical and social scientific study of digital media It also looks into the future and outlines an agenda for future research by examining not only the origins of the concept of Digital Culture but emerging topics and themes still in development such as the relation between digital technology and climate change artificial intelligence and knowledge sensation and aesthetics and the rise of new infrastructures reinventing not only the built environment but the boundaries of nations and sovereignty

Culture's Software Dorota Brzozowska, Władysław Chłopicki, 2015-09-10 When Geert Hofstede famously defined culture as collective programming of the mind the definition broadly referred to culture as such including all the layers in his onion model The title of this volume Culture's Software represents a development of this original idea and was inspired by none other than Professor Hofstede himself He used this phrase over thirty years later when lecturing to an international group of scholars gathered in Poland to debate the idea of cultural communication styles which has in recent years been fruitfully discussed from a fresh perspective by scholars working within cognitive and cultural linguistics The debate has given rise to this book which will inspire further research into this fascinating subject

Agile Processes in Software Engineering and Extreme Programming Alberto Sillitti, Orit Hazzan, Emily Bache, Xavier Albaladejo, 2011-05-02 This book contains the refereed proceedings of the 12th International Conference on Agile Software Development XP 2011 held in Madrid Spain in May 2011 The year 2011 marked the 10th anniversary of the Agile Manifesto In this spirit the XP conference continued its fine tradition of promoting agility by disseminating new research results in a timely manner and by bringing together researchers and practitioners for a fruitful mutual exchange of experiences As introduced for XP 2010 there were again two different program committees one for research papers and one for experience reports Regarding the research papers 11 out of 56 submissions were accepted as full papers and as far as the experience reports were concerned the respective number was 4 out of 17 submissions In addition to these papers this volume also includes the short research papers the abstracts of the posters the position papers of the PhD symposium and the abstracts of the workshops

Software Theory Federica Frabetti, 2014-11-17 The cultural and philosophical study of software is crucial both within and outside of the university at an international level and across disciplines Software is increasingly considered the focus of digital media studies because of the perceived need to address the invisibility ubiquity and power of

digital media Yet software remains quite obscure to students and scholars in media studies the social sciences and the humanities This unique book engages directly in close readings of technical texts and computer code in order to show how software works and in what sense it can be considered constitutive of culture and even of human thought Federica Frabetti combines this with an engagement with thinkers such as Bernard Steigler and Jacques Derrida to problematize the very nature of the conceptual system on which software is based and which has shaped its historical evolution The book argues for a radical demystification of software and digital technologies by addressing the mystery that surrounds its function and that affects our comprehension of its relationship between technology philosophy culture and society The Media Reader Hugh Mackay,Tim O'Sullivan,1999-07-06 This essential sourcebook of key statements about transformations in media culture focuses on questions of democracy technology and culture It provides theoretical approaches to past and present media transformations and case studies of a range of media examining both old media in new times and emerging new media It explores the technological economic social and cultural processes implicated in the production regulation circulation and consumption of media forms **Self-Presentation and Self-Praise in the Digital Workplace** Anna Danielewicz-Betz,2021-12-07 Self Presentation and Self Praise in the Digital Workplace presents the findings of an interdisciplinary study of the self entrepreneurial self and in particular the rationale behind its need to self present under the current socio economic and business conditions It addresses the complex landscape of the levels typologies categories triggers as well as both internal and external factors impacting self praise in the context of a digital workplace with the focus on enterprise social media Hacking Diversity Christina Dunbar-Hester,2019-12-10 We regularly read and hear exhortations for women to take up positions in STEM The call comes from both government and private corporate circles and it also emanates from enthusiasts for free and open source software FOSS i e software that anyone is free to use copy study and change in any way Ironically rate of participation in FOSS related work is far lower than in other areas of computing A 2002 European Union study showed that fewer than 2 percent of software developers in the FOSS world were women How is it that an intellectual community of activists so open in principle to one and all a community that prides itself for its enlightened politics and its commitment to social change should have such a low rate of participation by women This book is an ethnographic investigation of efforts to improve the diversity in software and hackerspace communities with particular attention paid to gender diversity advocacy Times of Convergence. Technologies Across Learning Contexts Pierre Dillenbourg,Marcus Specht,2008-09-08 The European Conference on Technology Enhanced Learning EC TEL 2008 was the third event of a series that started in 2006 The two first editions were organized by Pro Learn <http://www.prolearn-project.org> a European Network of Excellence In 2008 several members of Kaleidoscope the other European Network of Excellence <http://www.noekaleidoscope.org> pub joined as co chair committee members reviewers and authors These two networks are no longer funded but our aim was to turn EC TEL into a sustainable series of high quality events and thereby to contribute to

the scientific landscape of technology enhanced learning A new network named STELLAR will be launched in 2009 with members from both existing networks as well as new members and will support the future editions of this conference The scope of EC TEL 2008 covered the different fields of learning technologies e cation psychology computer science The contributions in this volume address the sign of innovative environments computational models and architectures results of empirical studies on socio cognitive processes field studies regarding the use of te nologies in context collaborative processes pedagogical scenarios reusable learning objects and emerging objects groups and communities learning networks interaction analysis metadata personalization collaboration scripts learning adaptation collabo tive environments resources tangible tools as well as learning management systems
