

Step-by-Step Guide to Creating Software Development Requirements

? Elicitation

Discussions with stakeholders, reviewing existing documentation, and **understanding the project's goals and environment**. The aim is to gather information about the software system's **use cases and quality attributes**.

Analysis

Examining and refining the requirements gathered during elicitation. This may involve **grouping, eliminating, and prioritizing** requirements based on **stakeholder needs and goals**.

Specification

Documenting software development requirements in an SRS document. The SRS should **describe each requirement clearly and guide the development process**.

Validation

Verifying that the software development requirements are **realistic, valid, unambiguous, complete, and demonstrable**. This may involve using prototypes, use cases, reviews, or tests.

🔧 Management

Documenting, tracing, and agreeing on the software development requirements throughout the process. It involves **maintaining and updating the requirements** as the software development progresses and communicating any changes to stakeholders.
