Sojourner Truth as Orator Suzanne P. Fitch, Roseann Mandziuk, 1997-09-23 This work is an in depth analysis of the full breadth of Sojourner Truth's public discourse that places it in its proper historical context and explores the use of humor and narratives as primary rhetorical strategies used by this illiterate ex slave to create a powerful public persona. The book provides a comprehensive survey of the life of Sojourner Truth and includes a unique and authoritative compilation of primary rhetorical documents such as speeches, songs and public letters. This is the only major work to date that analyzes the breadth of Sojourner Truth's public discourse. The volume includes a complete and authoritative compilation of her extant rhetoric including several versions of the same speech, reports of her speaking appearances, public letters published by Truth in newspapers and songs written and performed by her as part of her public lectures. Three chapters address the rhetorical dimensions of Truth's public persona. First an historical survey contextualizes her life and speaking from slave to reformer placing into perspective the variety of experiences that comprised her background. Second an analysis of Truth's use of humor focuses upon how she employed the strategies of superiority and incongruity in her refutation of opponents and the establishment of her own credibility. Third a critique of Truth's use of narratives in her discourse reveals how both her speeches and songs rely upon three fundamental stories for their persuasive impact: her slave life and religious conversion, her use of the black jeremiad to portray race differences and her tales of woman's strength and moral conviction. The volume concludes with a consideration of Truth's status as a folk legend and how she wished to be remembered. **Exploring Mars**

Scott Hubbard, 2012-02-01 The Red Planet has been a subject of fascination for humanity for thousands of years becoming part of our folklore and popular culture. The most Earthlike of the planets in our solar system, Mars may have harbored some form of life in the past and may still possess an ecosystem in some underground refuge. The mysteries of this fourth planet from our Sun make it of central importance to NASA and its science goals for the twenty first century. In the wake of the very public failures of the Mars Polar Lander and the Mars Climate Orbiter in 1999, NASA embarked on a complete reassessment of the Mars Program. Scott Hubbard was asked to lead this restructuring in 2000 becoming known as the Mars Czar. His team's efforts resulted in a very successful decade long series of missions each building on the accomplishments of those before it that adhered to the science adage follow the water when debating how to proceed. Hubbard's work created the Mars Odyssey mission, the twin rovers Spirit and Opportunity, the Mars Reconnaissance Orbiter, the Phoenix mission and most recently the planned launch of the Mars Science Laboratory. Now for the first time Scott Hubbard tells the complete story of how he fashioned this program describing both the technical and political forces involved and bringing to life the national and international cast of characters engaged in this monumental endeavor. Planetary Dreams Robert Shapiro, 2008-05-02 The Quest To Discover Life Beyond Earth The dreams that I write of are not the usual ones the images that come up in our minds involuntarily during certain stages of sleep but rather the hopes and expectations that we have lavished upon other worlds around us from the Preface The surprisingly long history of debate over extraterrestrial life is full of marvelous visions of what life out there might be like as well as remarkable stories of alleged sightings and heated disputes about the probability that life might actually have arisen more than once In Planetary Dreams acclaimed author Robert Shapiro explores this rich history of dreams and debates in search of the best current answers to the most elusive and compelling of all questions Are we alone In his pursuit he presents three contrasting views regarding how life might have started through Divine Creation by a highly unlikely stroke of luck or by the inevitable process of a natural law that he terms the Life Principle We are treated to a lively fictional dinner debate among the leading proponents of these schools of thought with the last named group arguing that life has almost surely formed in many places throughout the universe and the others that life may well be entirely unique to our own blue planet To set the stage for a deep exploration of the question the author then leads us on a fantastic journey through the museum of the cosmos an imagined building that holds models of the universe at different degrees of magnification We then journey deep into inner space to view the astonishingly intricate life of a single cell and learn why the origin of such a complex object from simple chemical mixtures poses one of the most profound enigmas known to science Writing in a wonderfully entertaining style Shapiro then reviews the competing theories about the start of life on Earth and suggests the debate may best be settled by finding signs of life on the other worlds of our solar system He takes us on a guided tour of the most likely sites from the underground hot springs of Mars to the ice covered oceans of Jupiter s airless moons Along the way he shares a wealth of fascinating stories about the ways in which our views of the heavens have changed from the theories of ancient philosophers who argued that the Moon was inhabited to the current Origins and Astrobiology initiatives of NASA He describes the probes that will be sent out in the near future in pursuit of the first compelling physical evidence of life beyond Earth and concludes with a radical suggestion about how this quest might be supported through the next millennium As we launch into an exciting new era of space exploration Planetary Dreams offers a thoughtful and entertaining exploration of both the history of our hopes and expectations and a vision of a possible future in which the discovery of life elsewhere will provide a new view of our place in the universe
