Win32 Perl Scripting Dave Roth,2000 Scripting has become an enormously popular method of managing and maintaining Windows NT and 2000 networks as evidenced by the success of Windows NT Shell Scripting which has sold over 30 000 copies in 2 years Simpler than programming yet allowing greater complexity and utility than packaged network management tools scripting is now the tool of choice by many of you network administrators Perl is yet another powerful element of the scripting arsenal yet since it has been ported to the Windows environment very little information has been published on how to employ this extremely effective tool Win32 Perl is so powerful that it can accomplish virtually any task that you may want to perform Dave Roth prolific creator of Win32 extensions is prepared to share his unique insight into how these tasks can be accomplished and provide scripts that can be immediately employed This book illustrates how Perl can automate many current mundane administrative tasks

Information Assurance Andrew Blyth,Gerald L. Kovacich,2013-04-17 When you first hear the term Information Assurance you tend to conjure up an image of a balanced set of reasonable measures that have been taken to protect the information after an assessment has been made of risks that are posed to it In truth this is the Holy Grail that all organisations that value their information should strive to achieve but which few even understand Information Assurance is a term that has recently come into common use When talking with old timers in IT or at least those that are over 35 years old you will hear them talking about information security a term that has survived since the birth of the computer In the more recent past the term Information Warfare was coined to describe the measures that need to be taken to defend and attack information This term however has military connotations after all warfare is normally their domain Shortly after the term came into regular use it was applied to a variety of situations encapsulated by Winn Schwartz as the three classes of Information Warfare Class 1 Personal Information Warfare Class 2 Corporate Information Warfare Class 3 Global Information Warfare Political sensitivities lead to warfare being replaced by operations a much more

politically correct word Unfortunately operations also has an offensive connotation and is still the terminology of the military and governments
