Cosmos Alexander von Humboldt, 1851 **Cosmos : a Sketch of a Physical Description of the Universe** Alexander von Humboldt, 1851 **Producing Power** Sonja D. Schmid, 2015-02-13 An examination of how the technical choices social hierarchies economic structures and political dynamics shaped the Soviet nuclear industry leading up to Chernobyl The Chernobyl disaster has been variously ascribed to human error reactor design flaws and industry mismanagement Six former Chernobyl employees were convicted of criminal negligence they defended themselves by pointing to reactor design issues Other observers blamed the Soviet style of ideologically driven economic and industrial management In *Producing Power* Sonja Schmid draws on interviews with veterans of the Soviet nuclear industry and extensive research in Russian archives as she examines these alternate accounts Rather than pursue one definitive explanation she investigates how each of these narratives makes sense in its own way and demonstrates that each implies adherence to a particular set of ideas about high risk technologies human machine interactions organizational methods for ensuring safety and productivity and even about the legitimacy of the Soviet state She also shows how these attitudes shaped and were shaped by the Soviet nuclear industry from its very beginnings Schmid explains that Soviet experts established nuclear power as a driving force of social not just technical progress She examines the Soviet nuclear industry's dual origins in weapons and electrification programs and she traces the emergence of nuclear power experts as a professional community Schmid also fundamentally reassesses the design choices for nuclear power reactors in the shadow of the Cold War's arms race Schmid's account helps us understand how and why a complex sociotechnical system broke down Chernobyl while unique and specific to the Soviet experience can also provide valuable lessons for contemporary nuclear projects *Cosmos* Alexander von Humboldt, 1880 **Cosmos: A Sketch of a Physical Description of the Universe** Alexander Von Humboldt, 2023-02-24 Reprint of the original first published in 1871 The publishing house Anatiposi publishes historical books as reprints Due to their age these books may have missing pages or inferior quality Our aim is to preserve these books and make them available to the public so that they do not get lost *Guillevic-Levertov - Selected Poems* Eugene Guillevic, Denise Levertov, 1969-02 **Cosmos a Sketch of a Physical Description of the Universe by Alexander Von Humboldt**, 1851 **Les merveilles célestes** Camille Flammarion, 1913 [The Early Avant-Garde in Twentieth-Century Literature and Art](#) Willard Bohn, 2018-05-11 This book focuses on avant garde literature and art in Europe and America during the first quarter of the twentieth century It examines five movements that shaped our response to the demands of the modern age and contributed to the creation of a modern sensibility Cubism Futurism the Metaphysical School Dada and Surrealism Each of these arose in response to recent scientific technological and or philosophical developments that drastically affected modern civilization In turn each was responsible for a major paradigm shift that altered the way in which we view and respond to the world around us The final chapter is comparative in nature and studies the role of the mannequin

in literature and art during the same period **The stadium century** Robert W. Lewis, 2016-12-08 The stadium century traces the history of stadia and mass spectatorship in modern France from the v lodromes of the late nineteenth century to the construction of the Stade de France before the 1998 soccer World Cup As the book demonstrates the stadium was at the centre of debates over public health and urban development and proved to be a key space for mobilising the urban crowd for political rallies and spectator sporting events alike After 1945 the transformed French stadium constituted part of the process of postwar modernisation but also was increasingly connected to global transformations to the spaces and practices of sport Drawing from a wide range of sources the stadium century links the histories of French urbanism mass politics and sport through the stadium in an innovative work that will appeal to historians students of French history and the history of sport and general readers alike Shaping the Novel Constantina Thalia Mitchell, Paul Raymond Côté, 1996-10-01 The dialogue between form and message is intrinsic to the novel as genre Yet the strength of that discourse has been shaken in the twentieth century by an increasing doubt about affirmations of any kind and a growing awareness of the relativity of knowledge and perception The novel reflects this intellectual current by turning its glance inward to mediate on the creative act as a form of self contained assertion of its own particular significance The three writers on whom this study focuses all major twentieth century authors were chosen because they can be considered as important representatives of this novelistic self consciousness Building on Andr Malraux s vision of the colloquium as an open ended verbal interchange this study calls upon the voices of Anne H rbert and Patrick Modiano to enter into a dialogue on novelistic form Rouge Mona Awad, 2025-02-18T15:05:00-05:00 Mirabelle quitte Montr al pour la Californie afin d y claircir les circonstances du d c s de sa m re Son enqu te la m ne aux portes de la tr s s lecte Maison de M duse un spa somptueux aux apparences de secte auquel sa m re accordait toute sa confiance Note sur certaines colorations de la lune et du soleil J.
