Koyzis, 2014-03-13 The quest to escape authority has been a persistent feature of the modern world animating liberals and Marxists Westerners and non Westerners alike Yet what if it turns out that authority is intrinsic to humanity What if authority is characteristic of everything we are and do as those created in God s image even when we claim to be free of it What if kings and commoners teachers and students employers and employees all possess authority This book argues that authority cannot be identified with mere power is not to be played off against freedom and is not a mere social construction Rather it is resident in an office given us by God himself at creation This central office is in turn dispersed into a variety of offices relevant to our different life activities in a wide array of communal settings Far from being a conservative bromide the call to respect authority is foundational to respect for humanity itself *In Conflict No Longer* Irene Taviss Thomson, 2000 Drawing on social criticism self help manuals and the social scientific analysis of American character *In Conflict No Longer* examines American thinking about individualism conformity and community from 1920 through 1995 Taviss Thomson s analysis reveals a basic shift in American culture from a belief that the individual is necessarily in conflict with society and that the self chafes against the constraints imposed by society to a belief that the self is expressed in the groups relationships and subcultures that help shape it Taviss Thomson contends that this new model of a relational or embedded self arose due to a weakening of traditional identities based on occupation social class gender and age which left individuals freer to construct their own identities In an age where Americans increasingly abandon the traditional mythology of an individual struggling against social constraints *In Conflict No Longer* forecasts a picture of American culture for the next millennium **Current Bibliography of Epidemiology**, 1972 Monthly with annual

Fitzgerald's Craft of Short Fiction Alice Hall Petry, 1989
 Normal0falsefalsefalseMicrosoftInternetExplorer4 Fitzgerald's Craft of Short Fiction offers the first comprehensive study of the four collections of short stories that F Scott Fitzgerald 1896 1940 prepared for publication during his lifetime Flappers and Philosophers 1920 Tales of the Jazz Age 1922 All the Sad Young Men 1926 and Taps at Reveille 1935 These authorized collections which include works from the entire range of Fitzgerald's career from his undergraduate days at Princeton to his final contributions to Esquire magazine provide an ideal overview of his development as a short story writer Originally published in 1989 this volume draws upon Fitzgerald's copious personal correspondence biographical studies and all available criticism and analyzes how Fitzgerald perceived his achievements as a writer of short fiction from both artistic and commercial standpoints Petry pays close attention to the individual stories exploring how Fitzgerald's growing technical expertise and the evolution of his themes reflect changes in his personal life Russian Studies and Comparative Politics

Frederic J. Fleron Jr., 2016-12-27 This book brings together several of the author's empirical studies that demonstrate the strength and utility of sociologist Robert Merton's classic middle range theory for understanding aspects of both Soviet and post Soviet Russian politics Some of those studies demonstrate that testing middle range social science theory could take place even in the Soviet era when there were significant limitations of access to empirical data and meaningful field research in the USSR was all but impossible In the introductory chapter the author explains the need for and advantages of studying Russian and Soviet politics from the perspective of middle range social science theory Then follow three chapters analyzing methodological issues in Soviet post Soviet studies The author presents his six empirical studies employing middle range social science theories to explore in Russia USSR dimensions of organizations ideology and decisionmaking technology transfer and cultural diffusion political culture public opinion and democratization and congruence of authority patterns in state society relations The book concludes with a chapter arguing the advantages of thinking theoretically about Russian and Soviet politics with the establishment of a new epistemic community organized around studies employing middle range theory This book presents examples of solutions to long standing debates between area studies and the academic disciplines and between idiographic and nomothetic approaches to knowledge in the social sciences In contrast to the tradition of Carnivals and Cockfights in Russian Soviet area studies since the mid 20th Century the book offers a new way of approaching the study of Russian politics for the 21st Century Resources in Education , 1988
