THE FROG BOOK MARY C. DICKERSON,1906 *Animal Communication and Noise* Henrik Brumm,2013-12-16 The study of animal communication has led to significant progress in our general understanding of motor and sensory systems evolution and speciation However one often neglected aspect is that signal exchange in every modality is constrained by noise be it in the transmission channel or in the nervous system This book analyses whether and how animals can cope with such constraints and explores the implications that noise has for our understanding of animal communication It is written by leading biologists working on different taxa including insects fish amphibians lizards birds and mammals In addition to this broad taxonomic approach the chapters also cover a wide array of research disciplines from the mechanisms of signal production and perception to the behavioural ecology of signalling the evolution of animal communication and conservation issues This volume promotes the integration of the knowledge gained by the diverse approaches to the study of animal communication and at the same time highlights particularly interesting fields of current and future research Reptiles and Amphibians of Prince Edward County, Ontario Peter Christie,1997-07-15 Reptiles and Amphibians of Price Edward County Ontario is a comprehensive look at the little known residents of a well known corner of rural Ontario Complete with descriptions and illustrations the book provides serious and amateur naturalists with a thorough compilation of recent and historic reports of the some thirty species of turtles snakes frogs toads and salamanders that are or once were found in this unique part of the province The text acquaints readers with the likelihood of encountering these fascinating creatures in the area while maps of all known records illustrate where these animals have been uncovered in the past Discussions of changes in species abundance offer a sense of the shifts that have taken place in reptile and amphibian communities in the area over time **Ecoacoustics** Almo Farina,Stuart H. Gage,2017-05-22 The sounds produced by geophonic biophonic and technophonic sources are relevant to the function of natural and human modified ecosystems Passive recording is one of the most non invasive technologies as its use avoids human intrusion during acoustic surveys and facilitates the accumulation of huge amounts of acoustical data For the first time this book collates and reviews the science behind ecoacoustics illustrating the principles methods and applications of this exciting new field Topics covered in this comprehensive volume include the assessment of biodiversity based on sounds emanating from a variety of environments the best technologies and methods necessary to investigate environmental sounds implications for climate change and urban systems the relationship between landscape ecology and ecoacoustics the conservation of soundscapes and the social value of ecoacoustics areas of potential future research An invaluable resource for scholars researchers and students Ecoacoustics The Ecological Role of Sounds

provides an unrivalled set of ideas tools and references based on the current state of the field

The Maryland Amphibian and Reptile Atlas Heather R. Cunningham, Nathan H. Nazdrowicz, 2018-11-26 The definitive resource for finding identifying and conserving Maryland's amphibians and reptiles Naturalists herpetologists and ecologists alike agree that tracking herpetofauna is a challenging undertaking Scientists are concerned about the decline of once familiar species but evidence has often been too anecdotal to support firm conclusions To better understand the distribution of amphibians and reptiles in Maryland and forecast species futures in a time of accelerated environmental threats conducting a comprehensive statewide survey updating 1970s era distribution maps seemed ideal However this endeavor was of an impossibly ambitious scope for scientists alone to tackle Enter the Maryland Amphibian and Reptile Atlas project comprising nearly a thousand dedicated citizen scientists who discovered and recorded the locations of herpetofauna throughout every corner of Maryland In The Maryland Amphibian and Reptile Atlas Heather R Cunningham and Nathan H Nazdrowicz present the findings of this massive undertaking This definitive guide combines nearly 160 comprehensive new herpetological maps with historical distribution maps and in depth species accounts Color photos illustrate the natural history of the 89 species of frogs salamanders turtles snakes and lizards that call the state home Essays discuss historical studies the effects of Maryland's current climate geology and habitat diversity and the myriad conservation issues these animals face This richly detailed book represents a triumph of citizen science and the culmination of an intensive research partnership It will appeal to both amateurs and professionals interested in herpetology natural history or ecology as well as those with a special interest in Maryland's biodiversity

Sounds Wild and Broken David George Haskell,2023-03-07 Finalist for the 2023 Pulitzer Prize in General Nonfiction and the 2023 PEN E O Wilson Literary Science Writing Award Winner of the Acoustical Society of America s 2023 Science Communication Award A glorious guide to the miracle of life s sound The New York Times Book Review A lyrical exploration of the diverse sounds of our planet the creative processes that produced these marvels and the perils that sonic diversity now faces We live on a planet alive with song music and speech David Haskell explores how these wonders came to be In rain forests shimmering with insect sound and swamps pulsing with frog calls we learn about evolution s creative powers From birds in the Rocky Mountains and on the streets of Paris we discover how animals learn their songs and adapt to new environments Below the waves we hear our kinship to beings as different as snapping shrimp toadfish and whales In the startlingly divergent sonic vibes of the animals of different continents we experience the legacies of plate tectonics the deep history of animal groups and their movements around the world and the quirks of aesthetic evolution Starting with the origins of animal song and traversing the whole arc of Earth history Haskell illuminates and celebrates the emergence of the varied sounds of our world In mammoth ivory flutes from Paleolithic caves violins in modern concert halls and electronic music in earbuds we learn that human music and language belong within this story of ecology and evolution Yet we are also destroyers now silencing or smothering many of the sounds of the living Earth Haskell takes us to threatened forests noise filled oceans and loud city streets and shows that sonic crises are not mere losses of sensory ornament Sound is a generative force and so the erasure of sonic diversity makes the world less creative just and beautiful The appreciation of the beauty and brokenness of sound is therefore an important guide in

today's convulsions and crises of change and inequity *Sounds Wild and Broken* is an invitation to listen wonder belong and act **Boys' Life** ,1957-08 Boys Life is the official youth magazine for the Boy Scouts of America Published since 1911 it contains a proven mix of news nature sports history fiction science comics and Scouting
