Adventures in Coding Eva Holland, Chris Minnick, 2016-03-28 Learn to code the fun way with nine real projects for true beginners Adventures in Coding is written specifically for young people who want to learn how to code but don t know where to begin No experience No problem This book starts from the very beginning to take you from newbie to app builder in no time You ll learn by doing as you build projects designed to help you master fundamental programming skills and you ll have a great time doing it These skills form the foundation of any programmer s tool set and you ll continue to use them as you graduate to other devices and more difficult projects Each chapter includes a video to help clear up any confusion and make sure you really understand so you can keep programming your way through every single project without hitting major roadblocks If you re ready to start designing your own program this book will help you get started today More and more kids are learning to code and many schools offer basic programming classes as part of the regular curriculum This book is

structured like a class starting with the basics and building skill upon skill making it both a perfect accompaniment to formal instruction and an ideal guide for self study Learn the basic programming skills you ll use everywhere Build nine fun projects from super basic to pretty challenging Build the skills you need to create bigger and better apps Watch video tutorials for extra help and explanations How many times have you played with an app only to find yourself wishing it had this or that feature If you learn how to code you can be the creator of the next big app But it all starts with that first small project

And now a word from our sponsor When the first radio stations signed on in the 1920s this phrase was unknown to listeners Fifteen years later however advertising ruled the airwaves Selling Radio recounts the initial difficult coupling of broadcasting and advertising shows how the triumph of advertising transformed the content of radio programming and exposes the complicity of business technology and government in reducing the promise of radio to the adage that time is money Susan Smulyan argues that the emergence of commercialized broadcasting was not an inevitable development but rather the result of a bitter struggle over the form and content of the new technology Initially schools churches and small businesses

sponsored stations broadcasting local sporting events and such home grown comedy and musical acts as The Happiness Boys In the mid 1920s the enthusiasm that greeted the idea of a national broadcasting system quickly soured with the announcement that wired networks using AT T s long lines would be financed by selling radio time to advertisers Early opponents of commercial radio included not only listeners but also station owners educators religious leaders and Secretary of Commerce Herbert Hoover all of whom decried the worthless stuff of advertising Even prospective advertisers doubted that radio ads would work Selling Radio describes how the radio industry overcame the opposition and in the process dramatically altered the content of broadcasting As listeners were reduced to consumers folksy regional programs were replaced with slick fully scripted shows and schedules created by sponsors to attract a nationwide audience With the passage of the Communications Act of 1934 the paradigm of commercial driven programming was established and later adopted without question by the next great communications technology television [Feminist Bookstore News](#) ,1995 **Principles**
